QS STARS

The QS Stars™ rating system is operated by the QS Intelligence Unit, the independent compiler of the QS World University Rankings® since 2004. The system evaluates universities across a wide range of important performance indicators as set against pre-established international standards. By covering a broader range of criteria than any world ranking exercise, QS Stars shines a light on both the excellence and the diversity of the rated institution.

Facts regarding APU's achievements in the latest QS World University rankings:

QS World University Rankings 2026

- **Ranked #597** in the World - Top 2% of Universities Worldwide
- **Ranked No.16** in the World for International Students
- **Ranked No. 10** in the World for International Students Diversity
- **Ranked Top 170** for International Faculty in the World

QS World University Rankings : Asia 2026

- **Ranked #147** in Asia
- **Ranked #39** in South East Asia

TOP 20 IN ASIA & TOP 5 IN ASEAN

APU has achieved outstanding recognition in the AppliedHE All Asia 2026 Private University Ranking. This remarkable achievement reflects our unwavering commitment to academic excellence, innovation, and global impact. The AppliedHE Private University Ranking: All Asia was created with the goal of measuring the things about private universities that students deciding on their higher education journey find most important. The ranking measures what is important to students: the quality of teaching and learning, Employability, Research, Internationalisation, Community Engagement and Institution Reputation.

APU MAKES WAVES IN THE QS WORLD UNIVERSITY RANKING 2026 - TOP 2% GLOBALLY

The Asia Pacific University of Technology & Innovation (APU) has been officially recognised among the world's leading universities in the QS World University Rankings 2026, placing at #597 globally — positioning APU within the Top 2% of universities worldwide. APU is also ranked #16 in the world for International Students, reflecting its highly diverse and globally inclusive learning community.

APU IS AWARDED 2025 EMPLOYERS' CHOICE OF UNIVERSITY - TALENTBANK

Renowned for its 100% employability rate among graduates, APU underlined its strengths by being selected as the 2025 Employers' Choice of University in Talentbank's annual survey of employers. APU graduates emerged as 6 STAR of Employers' Top Choice in several key disciplines, namely Computing & IT, Animation, Advertising, Finance, and Marketing. APU has also kept its Leadership position in Computing & IT as CHAMPIONS of the Category. This significant achievement underlines APU's strategic alignment with emerging industry needs and its consistent track record in nurturing high-calibre talent.

APU IS AWARDED BEST AI UNIVERSITY, BEST TECH UNIVERSITY & BEST FUTURE READY UNIVERSITY - PC.COM AWARDS 2025

The PC.com Awards are prestigious accolades that celebrate organisations demonstrating excellence and leadership in technology and innovation. At the 2025 Awards, Asia Pacific University of Technology & Innovation (APU) once again stood out, earning Best Tech University, Best Future Ready University, and the newly introduced Best AI University titles, as voted by PC.com readers. These achievements reaffirm APU's dedication to delivering world-class digital technology programmes and shaping future-ready graduates. APU continues its winning streak, having previously secured both Best Tech University and Best Future Ready University in 2024, and Best Tech University in 2023.

APU'S LIST OF FIRSTS:

1st Malaysian University to achieve Five Stars Plus in the latest QS Stars Rating
1st Local Institute awarded Multimedia Super Corridor Status

Experience

APU's iconic campus

Asia Pacific University of Technology & Innovation (APU) is amongst Malaysia's Premier Private Universities, and is where a unique fusion of technology, innovation and creativity works effectively towards preparing professional graduates for significant roles in business and society globally.

An Ultra-modern Campus Built Today for the Needs of Tomorrow

Asia Pacific University of Technology & Innovation (APU)'s Ultra-Modern University Campus in MRANTi - Technology Park Malaysia is designed to be the state-of-the-art teaching, learning and research facility providing a conducive environment for students and staff. TPM is the ideal location for this new and contemporary campus due to its strong positioning as Malaysia's primary hub for leading-edge and high-tech developments in a wide variety of areas. It is also located in one of the most rapidly developing areas in Kuala Lumpur, and is well served and accessible through major highways, LRT and other forms of public transportation.

APU has earned an enviable reputation as an award-winning University through its achievements in winning a host of prestigious awards at national and international levels.

- A Stylish Blend of Functionality & Accessibility
- A Unique Fusion of Technology, Innovation and Creativity
- Cutting-edge Technologies
- A Wide Variety of Spaces to Learn, Engage & Transform
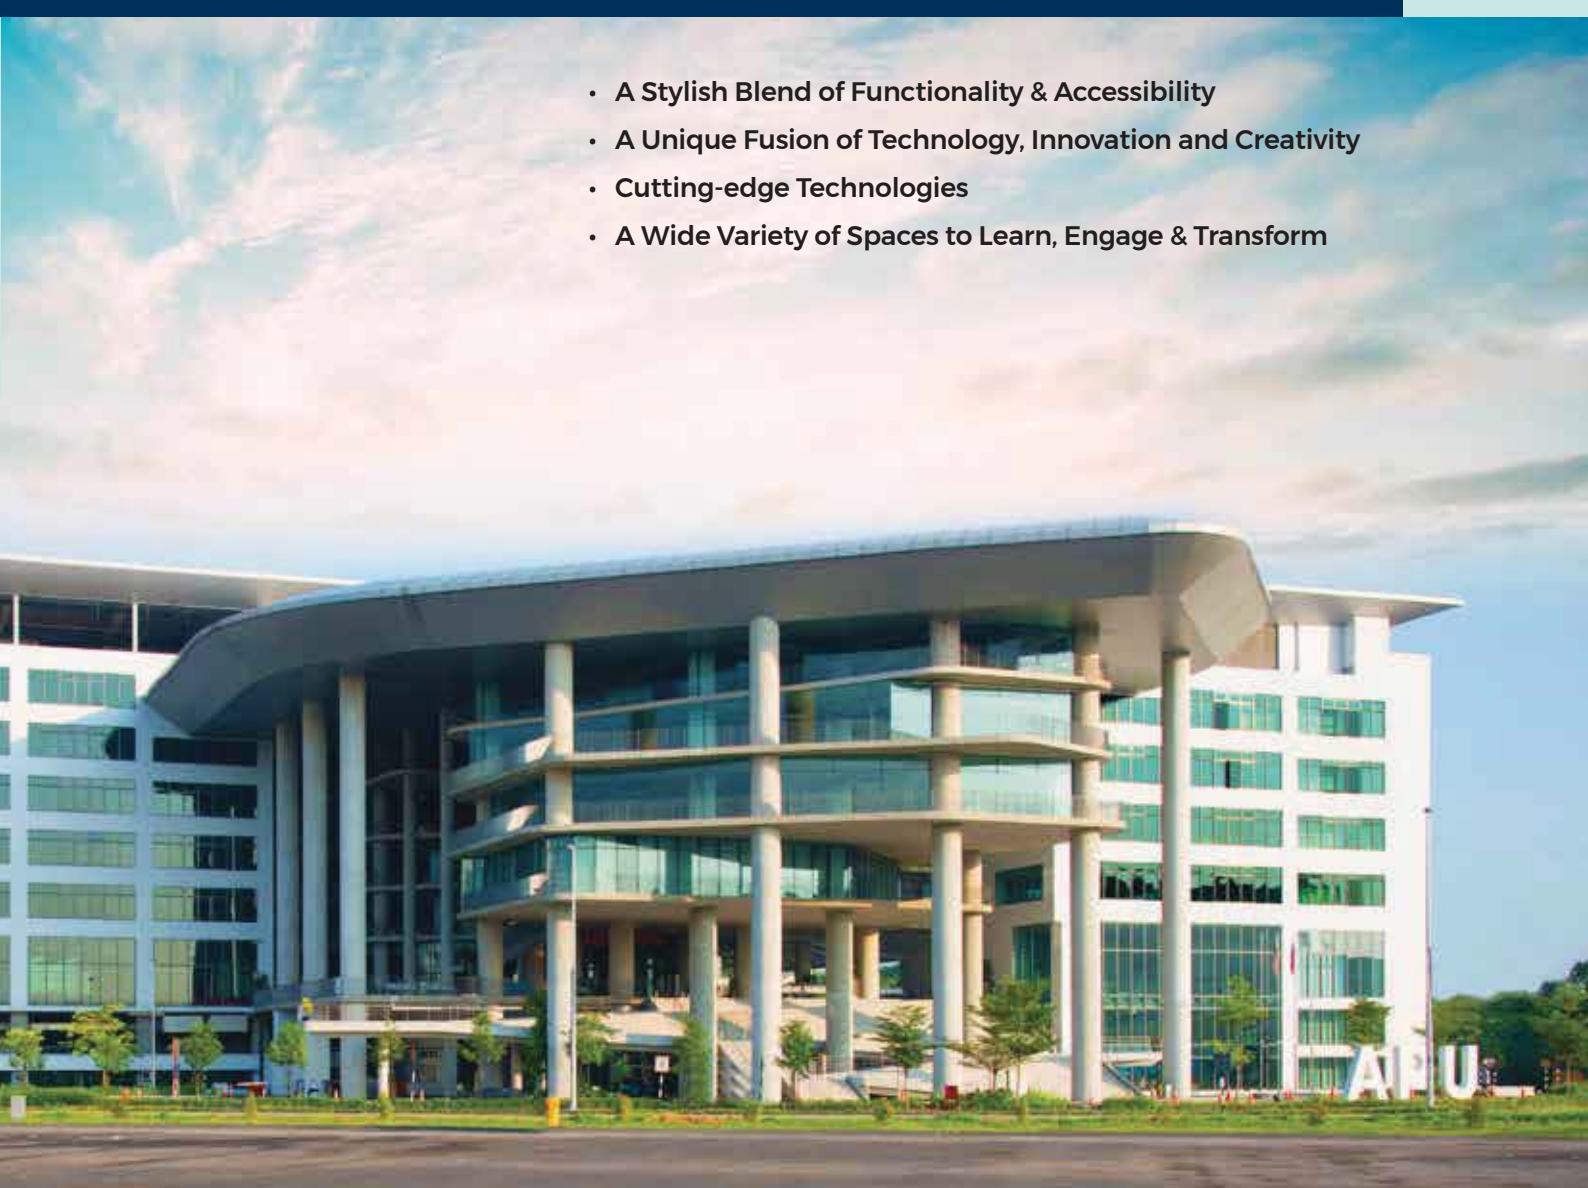

APU's iconic campus is setting a new benchmark for design excellence among Malaysian Universities, combining an eco-friendly campus with a dynamic blend of technology and innovation to enable professional learning. It is a magnificent teaching & learning space for our students & staff designed by our award-winning architects & consultants.

100
Employability*

Outstanding Support

Regardless of the programme you choose, you will be supported by highly qualified and enthusiastic professionals. Many enjoy an international reputation for their research and actively engage with leading names in the industry.

100% of our graduates are employed by graduation*; this is not just a number, but a significant symbol of our success and pride in nurturing professionals for global careers.

Latest Graduate Tracer Study by Ministry of Higher Education, Malaysia.

%

Industry Ready Graduates

The APU Career Centre connects and engages with over 12,000 Employers to ensure that our graduates are highly employable in both local and international corporations, as it closely supports APU students in both internship and career placement activities.

Work-ready, World-ready

Study with us and we'll equip you to become a world-ready professional, with the knowledge, attributes, skills and expertise that employers look for.

Employers are demanding that graduates not just have qualifications, but also have the experience and ability to contribute to the workplace. To meet these demands, APU develops programmes and partnerships with academic and industry partners, with a heavy focus on applied learning. This helps to ensure that the skills and knowledge taught at APU are up-to-date and in high demand.

RANKED

#16

in the World
for International Students

QS World University Rankings 2026

A Hub of Cultural Diversity

With students from over 130 countries, we ensure that you will gain memorable experiences alongside the diversifed and colourful cultural environment. We have students from Asia, Central Asia, Middle East, Africa, Europe, Latin America and Oceania. Our International Students Support Centre helps you with the procedure to apply for your Student Pass before coming here. Upon arrival in Kuala Lumpur, you will be greeted with warmth by our friendly staff, who will pick you up and bring you to our campus.

Student Welcome Team

The Student Welcome Team was established by Asia Pacific University of Technology & Innovation (APU) to improve the arrival experience of international students in Malaysia. "Warm Welcome, Warm Hello, Warm What's up" is the theme of this ASK ME Team.

A Truly International Community

Just like the beautiful country in which we are located, APU is a rich blend of traditional and modern styles. We have developed a singular character to embrace those things that set us apart. We pride ourselves on the quality of both our teaching and research as well as having a unique living and learning environment.

Student Life @ APU

Being a university student can be one of your most exciting expeditions. Higher education opens up a world of new ideas, intellectual growth, new adventures and the building of lifelong friendships. Here at APU, we support you to take the time to explore not only the educational experiences but also the wide range of social, sporting and cultural activities on campus.

World-class
Facilities @ APU

An Integrated Community

The campus aims to establish a community aspect for the university – where integration is the key. Walkways, classrooms, communal spaces and discussion areas promote connectivity and cultivates exchange of ideas among students from different disciplines and academics, to implement cooperative learning concepts in line with the Industry Revolution 4.0.

APU provides access to world-class resources across a wide range of disciplines. This translates into industry-ready skills and a competitive edge for graduates.
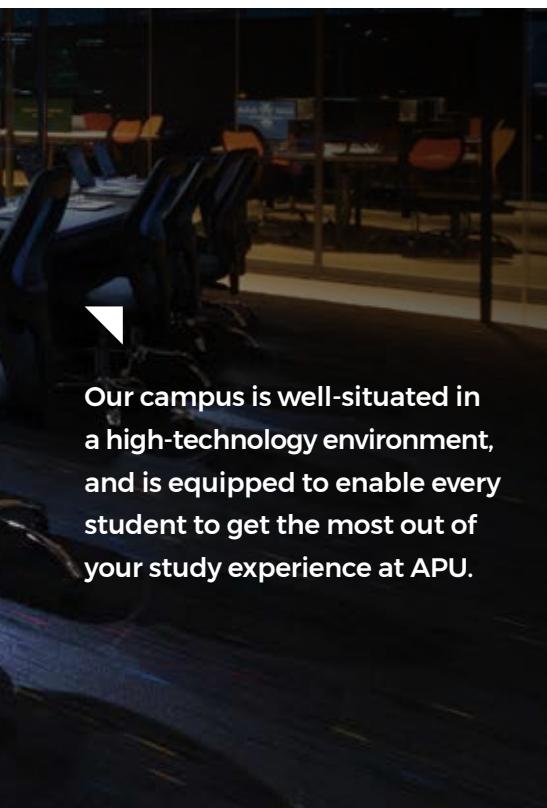

Our campus is well-situated in a high-technology environment, and is equipped to enable every student to get the most out of your study experience at APU.

Cutting-Edge Technologies

The Campus blends technology, integration, innovation and creativity under one roof. It provides not just a learning environment, but also a lively community spot for our students to formulate new ideas, gain intellectual growth and discover new adventures. It is not only a university campus, but also the nurturing ground for world-changing global ideas. All spaces are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, while enabling professional learning and cultivating global mindsets. APU, as Malaysia's leading technological university, is the incubator for self-starting and innovative APU graduates. Our educational technology environment supports the development of graduates of this calibre, in which well-equipped computing and engineering laboratories with advanced software, hardware and technologies place students at the forefront of technological excellence.

Social Interaction Platforms

Fitness Sweatzone, student lounges, sports facilities and breakout rooms provide spaces for relaxation and socialisation throughout the day. They are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, especially for students who are studying away from home.

Our Partner in Quality

De Montfort University (DMU), UK

150 years of academic excellence

De Montfort University (DMU) Leicester is a dynamic, 21st century UK university. With an original campus in Leicester, a new one in London and growing campuses around the world in Dubai, Kazakhstan and Cambodia, DMU has a truly global outlook and international reach.

At DMU, our supportive and nurturing community will empower you to realise your dreams. Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive job market and succeed in your career. The university is organised into four faculties; Arts, Design and Humanities, Business and Law, Health and Life Sciences and Computing, Engineering and Media. Our award-winning Careers Team provides guaranteed work experience opportunities including placements, internships and career mentoring to open doors that will help you achieve your ambitions..

DE MONTFORT UNIVERSITY LEICESTER
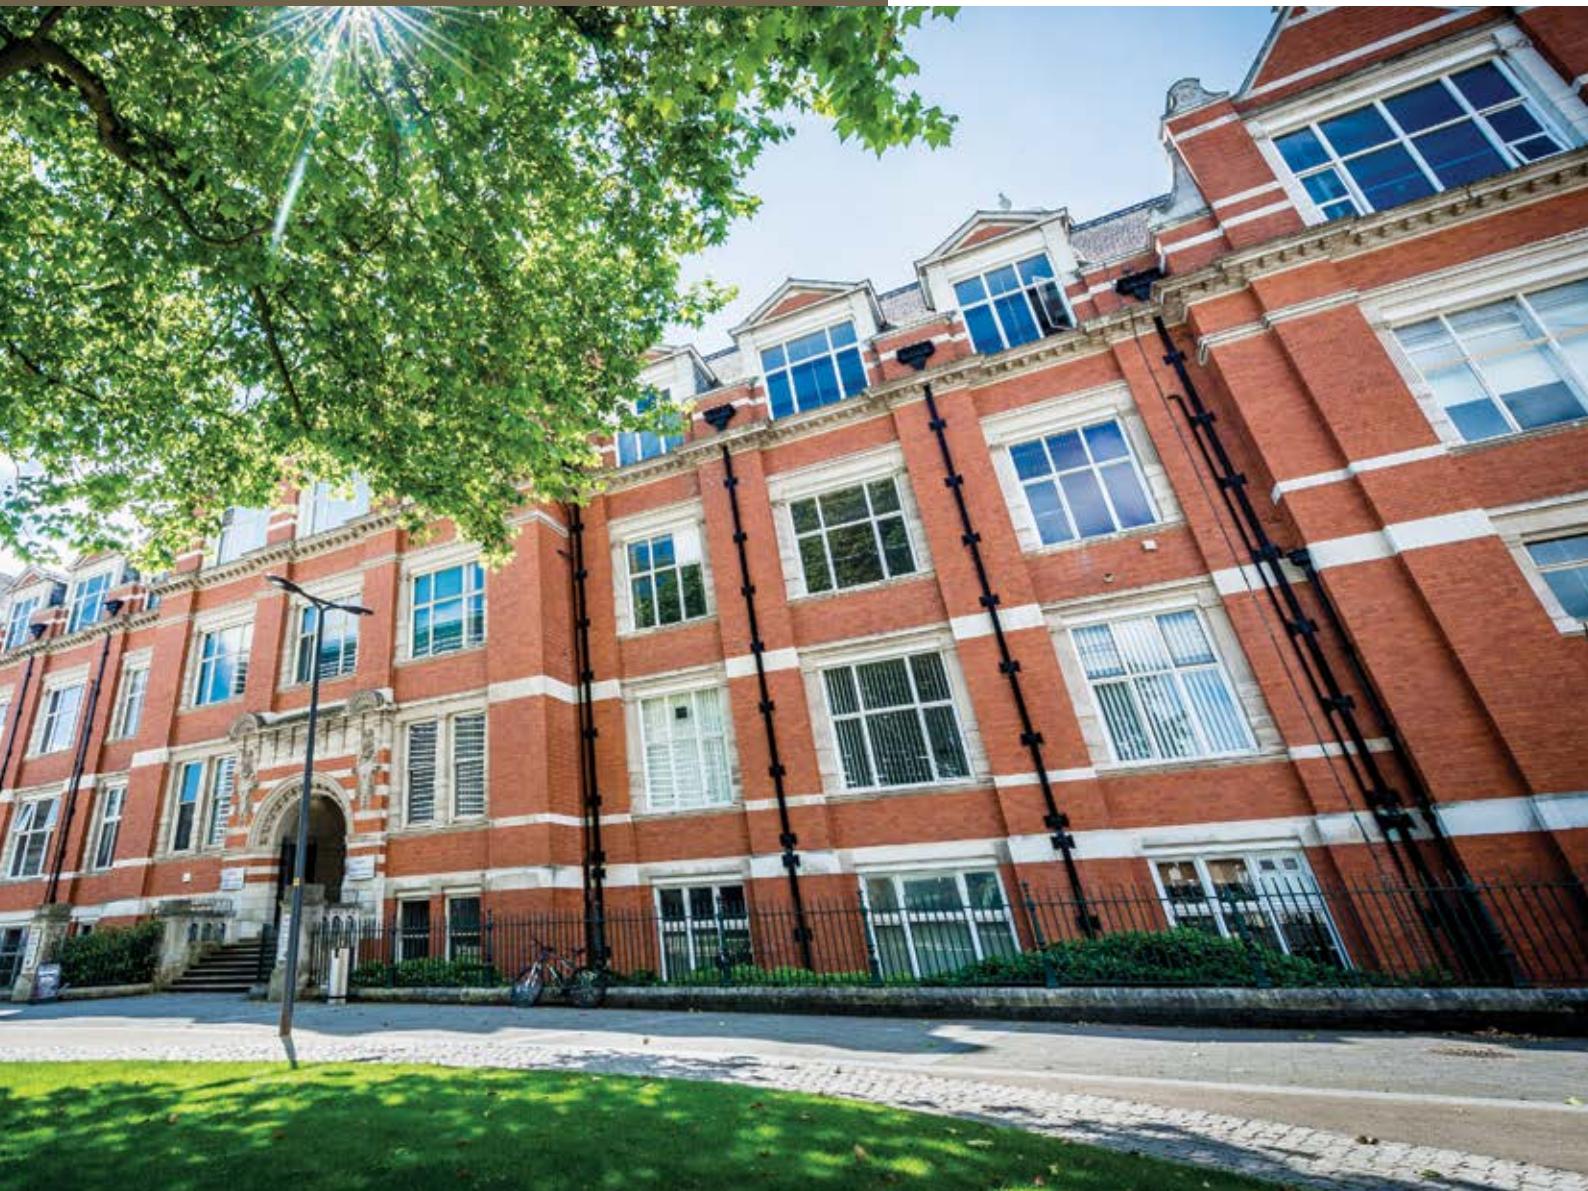

About DMU

- Since its beginnings in Leicester 150 years ago, DMU has transformed into a global university. We deliver outstanding education around the world, both at our own campuses and with our partner universities.

- Each year, international students from more than 140 countries choose to study at DMU.

- DMU is rated a 5-star 'excellent' institution by QS Top Universities for our teaching, facilities, employability, global outlook and more.

- DMU's Careers Team won Employability Team of the Year at the TargetJobs National Graduate Recruitment Awards for helping students reach their ambitions.

- DMU is the only UK university to be appointed as Chair of the hub for the United Nations' sustainable development goal 11 - sustainable cities and communities.

- Leicester is known for being welcoming and student-friendly, with a rich history and a diverse culture. It's been named the best city in the East Midlands to live and work (Good Growth for Cities Index, 2024).
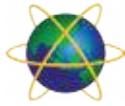

Double your Advantage

APU-DMU **Dual Degree Programme**

DUAL DEGREE
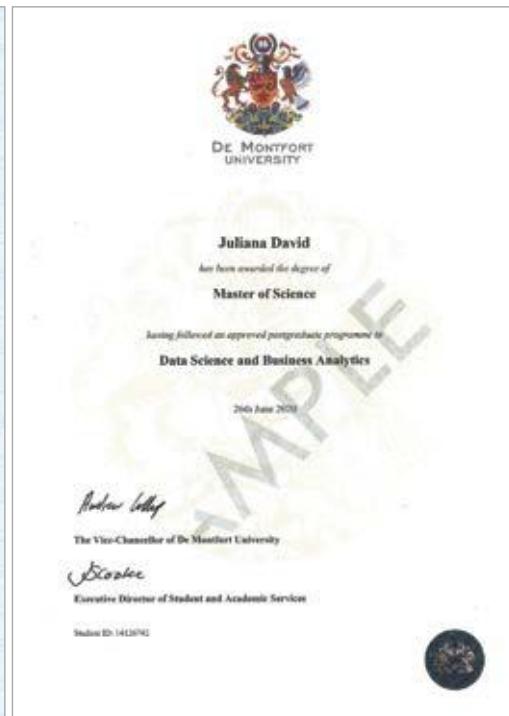

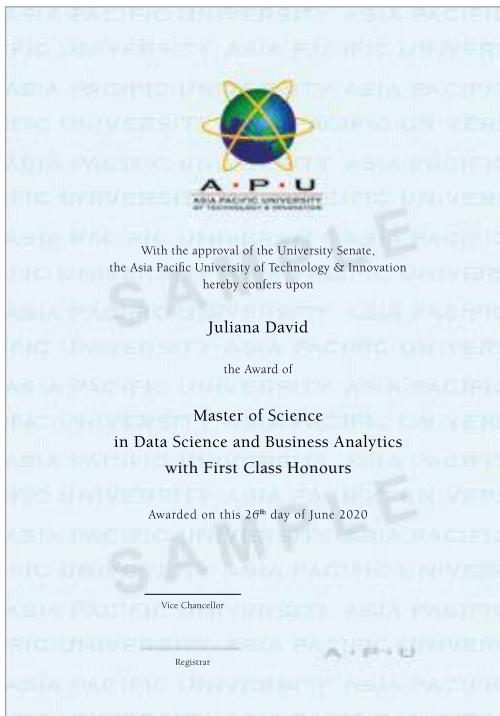

- APU's partnership with DMU enables students to be awarded Dual Awards - separate degree certificates from each institution – and enhances not just teaching and learning experiences, but also career prospects.

- Upon graduation, students will receive 2 Degree Certificates & Transcripts: 1 from APU, Malaysia and 1 from DMU, UK.

- Both degrees are recognised locally & internationally.

- The APU-DMU Dual Degree Programmes are offered under an approved collaboration in accordance with the QAA UK Quality Code for Higher Education for the Assurance of Academic Quality and Standards in Higher Education as published by the United Kingdom Quality Assurance Agency (QAA).

Future Proof Your Career

And land that dream job

CMI is the Chartered Management Institute, dedicated to increasing the number of professionally qualified managers and leaders. CMI works with education providers to inspire students to unleash their potential and become skilled, confident and successful managers and leaders identified by their Chartered status.

CMI DUAL ACCREDITATION

You have the exciting opportunity of enrolling for the APU-CMI Dual Certification by registering for a qualification through APU. By adding a CMI qualification to your University qualification you are really on the road to success.

- **Dual qualifications –** When you complete your studies you will have both your University qualification AND a CMI qualification.

- **Theory into practice –** CMI qualifications are highly regarded by employers as a testament that you can demonstrate the practical skills needed to perform in the workplace.

- **International stamp of approval –** CMI qualifications are linked to the QCF and European Qualification Framework, so you can be assured that the qualification you are taking is of the highest standard.

GIVE YOUR CAREER A HEAD START WITH

ENGLISH REQUIREMENTS (only applicable for International Students)

Please note that under Ministry of Higher Education regulations, only students who have achieved the minimum requirement in the English Language proficiency assessment as indicated above will be allowed to continue their studies in the main study programme. Students who do not have the required English Language achievement may apply for a student visa on conditional basis and are allowed to enrol in an English Language Certification programme at APU upon arrival in Malaysia and, subsequently, appear for the IELTS/ TOEFL/ PTE/ MUET assessment. Students who are unable to obtain the required level of English Competency during the maximum 12 months' period, will not be allowed to pursue their studies in the main programme and will have to return to their home country.

Students from English speaking countries and those with qualifications taught in English (previous Bachelor's/ Master's Degree taught in English) are exempted from English requirements. Applications for exemption must be accompanied by supporting documents.

Note: The above entry requirements may differ for specific programmes based on the latest programme standards published by Malaysian Qualifications Agency (MQA)

OVERALL PROGRAMME STRUCTURE

- Bachelor's degree in related fields with a minimum CGPA of 2.50 and not meeting a CGPA of 2.75 can be accepted, subject to a rigorous internal assessment.
- Bachelor's degree in related fields below a CGPA of 2.50 can be accepted, subject to a minimum of 5 years working experience in the relevant fields.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.50 as accepted by the Senate and with minimum of 5 years working experience in the relevant fields or any working experience in the Accounting related fields, subject to a rigorous internal assessment and passing pre-requisite courses.
- Relevant professional accounting qualifications equivalent to a bachelor's degree as accepted by the Senate.

English Requirements for International Students: IELTS 5.5

Master of Finance
Master of Finance with a specialism in FinTech
(Applicants with Bachelor's Degree in Business, Economics, Software Engineering, Banking & Finance, Engineering, Actuarial Science, Mathematics and Statistics maybe considered for entry to the Master of Finance programme.)
English Requirements for International Students: IELTS 6.5

- Bachelor's degree in related fields with a minimum CGPA of 2.75, or its equivalent qualification as accepted by the Senate.
- Bachelor's degree in related fields with a minimum CGPA of 2.50 and not meeting a CGPA of 2.75 can be accepted, subject to a minimum of 5 years working experience in the relevant fields.

Master of Science in Actuarial Science

- Bachelor's degree in Actuarial, Mathematics, Statistics or Computing with a minimum CGPA of 2.75, or its equivalent qualification as accepted by the Senate.
- Bachelor's degree in Actuarial, Mathematics, Statistics or Computing with a minimum CGPA of 2.50 and not meeting a CGPA of 2.75 can be accepted, subject to a rigorous internal assessment.
- Bachelor's degree in Actuarial, Mathematics, Statistics or Computing with CGPA less than 2.50 as accepted by the Senate and a minimum of 5 years of working experience in a relevant field may be accepted.
- Bachelor's degree in Finance or Economics with a minimum CGPA of 2.75 as accepted by the Senate, subject to passing pre-requisite courses.
- Bachelor's degree in Finance or Economics with a minimum CGPA of 2.50 as accepted by the Senate and a minimum of 5 years of working experience in a relevant field may be accepted, subject to passing pre-requisite courses.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.75 and a minimum of 5 years of working experience in the related fields as accepted by the Senate, subject to passing the pre-requisite courses, professional courses, or accredited micro-credentials programme.

English Requirements for International Students: IELTS 5.0

Master of Education in Learning Design and Technology
Postgraduate Diploma of Education in Learning Design and Technology (ODL)
Postgraduate Certificate of Education in Learning Design and Technology (ODL)

- Bachelor's degree in Education with a minimum CGPA of 2.50, or its equivalent as accepted by the Senate.
- Bachelor's degree in Education with a minimum CGPA of 2.00 can be accepted, subject to a rigorous internal assessment.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.50 as accepted by the Senate, subject to passing pre-requisite courses.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.00 can be accepted, subject to rigorous internal assessment and to passing pre-requisite courses.

English Requirements for International Students: IELTS 6.0

Note: Requirements also applicable to ODL programmes.

Masters Degree Programmes

- MSc in Software Engineering
- Master of Science in Artificial Intelligence
- Master of Science in Cyber Security
- MSc in Data Science and Business Analytics
- Master of Science in Digital Transformation
- MSc in Information Technology Management
- Master of Technology Management
- Master of Business Adminsitration
- Master of Business Administration with a specialism in:
  - Digital Leadership
  - Artificial Intelligence (MBAi)
  - Supply Chain Management
  - Business Analytics
  - Oil and Gas Management
  - Hospitality and Tourism
- Master of Science in Digital Marketing
- Master of Project Management
- Master of Accounting
- Master of Accounting in Forensic Analysis
- Master of Finance
- Master of Finance with a specialism in FinTech
- Master of Arts in Design Innovation Management
- Master in Digital Communication
- Master of Science in Actuarial Science
- Master of Education in Learning Design and Technology

- Master of Philosophy in Engineering
- Master of Philosophy in Management
- Master of Science in Computing
- Master of Philosophy in Immersive Technologies and Video Games Studies

100% Online

Open & Distance Learning (ODL)*

MSc in **SOFTWARE ENGINEERING**

(R/0612/7/0002)(02/27)(MQA/FA8836)

DUAL DEGREE

Duration:
Full-time   -   1+ years
Part-time   -   2-3 years

This programme is specifically designed to provide:

- An opportunity for professional development at an advanced level within the area of software engineering.
- Enhancement of skills and knowledge in specialist areas for practising IT professionals.
- The ability to undertake large-scale IT software development projects.
- The skills necessary to participate effectively in the design and implementation of software systems of high quality and reliability.

Career options

- Project Manager
- Software Architect
- Senior Software Developer
- Solutions Architect
- Software Engineer
- Software Consultant
- Chief Technology Officer (CTO)
- Development Manager
- Senior System Designer
- Application Engineer
- Software Test Engineer
- Software Quality Assurance (QA) Specialist
- R&D Specialist
- Senior Technical Lead
- Product Specialist

MD
Premier Digital
Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Undertake and effectively manage largescale and complex software development projects.
- Consider reliability and quality in the design of software systems
- Determine the security requirements for computer systems
- Apply and critique quality metrics in the assessment of software systems
- Participate in the design and implementation of high quality and reliable software systems
- Appreciate problems and suggest solutions associated with the development of software systems.
- Contribute to the advancement and development of software engineering theories and practices.
- Appreciate how an efficient technology based infrastructure is a key factor in enabling a business to gain a competitive edge.

Who Should Attend

This programme aims to develop specialist knowledge in the domain of Software Engineering (SE). It exposes students to the core principles and processes of SE fundamental to the successful development of systems capable of addressing emerging business needs. Students will have the opportunity to supplement their knowledge through elective modules in domain adjacent topics such as natural language processing, data management and big data analytics.

This programme is geared towards practicing software engineers within industry who seek formal qualifications in software engineering. In addition, IT professionals and managers who wish to upgrade their technical software engineering knowledge and IT skills to postgraduate level will find this programme attractive.

Modules & Project

This programme comprises 10 coursework modules and a Project.

There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Programming in Python
- Database for Data Science
- Systems Development Methods

Core Modules
- Managing Software Development Projects
- Reliability Management
- Object Oriented Software Systems Engineering
- Software Engineering Support Environments
- Software Quality Engineering
- Security Technologies
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*
- Internet Applications
- Network Design & Performance
- Data Management
- Big Data Analytics and Technologies
- Natural Language Processing

  * Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete industry-based major projects that are directly relevant to your work and your organisation or any substantial idea from the modules taken.

The project emphasis should involve the derivation of criteria for the selection of software engineering processes, methods and tools. It would be expected that a software prototype, review of current practices or specifications should be produced.

Master of Science in Artificial Intelligence

Artificial Intelligence is among the important key areas of focus in the era of Industrial Revolution 4.0. Application concepts and skill sets in areas such as Machine Learning, Natural Language Processing (NLP) & Automation are among the key deliverables of this programme, placing you at the forefront of technology, shaping you to be a part of the most demanded workforce of the future.

Joint Professional Certification by TIBCO Software Inc.

Upon completion of the Master of Science in Artificial Intelligence programme, in addition to their Masters Degrees, students will receive a professional certificate from TIBCO Software Inc. TIBCO is amongst the global leaders in Integration, Data Management and Analytics platforms that has a global clientele. In addition to the certification, TIBCO, as APU's industry partner, has provided all students & lecturers with complimentary access to the TIBCO Spotfire software for academic purposes. Students are utilising the software to perform tasks & projects related to data analytics.
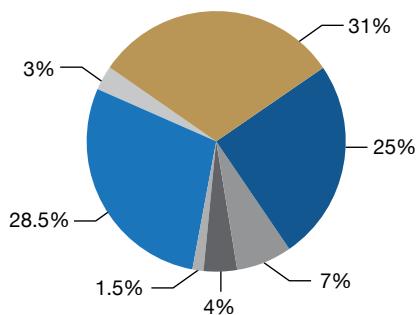

Enterprise leaders define AI as technology that:

- 31%
- 3%
- 28.5%
- 1.5%
- 4%
- 7%
- 25%

- Thinks and acts like human beings
- Can learn to do things better over time
- Can understand language
- Can answer questions
- Passes the "Turing test"
- All of the above
- Other

Rate of automation

Master of Science in
ARTIFICIAL INTELLIGENCE

(R/0613/7/0013)(06/29)(MQA/FA11933)

DUAL DEGREE

Duration:
Full-time - 1+ years
Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Advanced skills and techniques in artificial intelligence
- Research opportunities to solve meaningful industrial problems with artificial intelligence techniques
- Advanced research opportunities in artificial intelligence in preparation for doctoral studies.

Career options
- AI Engineer
- Data Scientist
- AI Researcher
- Intelligence Specialist
- Consultant
- AI Data Analyst
- Machine Learning Engineer
- Robotics R&D Engineer
- Machine Vision Engineer
- Artificial Intelligence Analyst
- Deep Learning Scientist
- Big Data Engineer
- Automation Expert

MD
Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

- Gain hands-on experience to implement Artificial Intelligence (AI) to solve problems
- Grasp knowledge on a wide range of subject matters ranging from Machine Learning, Robotics to Natural Language Processing.
- Effectively undertake and manage large scale and complex Artificial Intelligence (AI) projects.
- Engage in the design and implementation of Artificial Intelligence (AI) systems of high quality and reliability.
- Appreciate problems and suggest solutions associated with the development of Artificial Intelligence (AI) systems.
- Appreciate how an efficient Artificial Intelligence (AI) technology based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Draw upon the body of knowledge and be able to overcome human limits to solve new problems using Artificial Intelligence (AI).

Who Should Attend

This programme is geared towards practicing IT/ Computing professionals within industry who seek further formal qualifications in Artificial Intelligence. In addition, professionals and managers who wish to enhance themselves with Artificial Intelligence knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Artificial Intelligence/ Software Engineering/ Data Science background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)
- Programming in Python
- Database for Data Science
- Fundamentals in Artificial Intelligence

Core Modules
- Artificial Intelligence
- Image Processing and Computer Vision
- Fuzzy Logic
- Applied Machine Learning
- Computational Intelligence Optimization
- Natural Language Processing
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*
- Applied Robotics
- Pattern Recognition
- Expert Systems and Knowledge Engineering
- Business Intelligence Systems
- Multivariate Methods for Data Analysis
- Deep Learning

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You will be expected to conduct effective research in relation to Artificial Intelligence for both academic and industry purposes. Either route will require you to plan and conduct effective academic research, and produce one academic paper, consultancy report or academic paper in relation to an aspect of Artificial Intelligence.

TIBCO®

TIBCO certification is awarded to students who complete:
- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

Master of Science in Cyber Security

Rocheston Certified Penetration Tester

The **Rocheston Certified Penetration Tester (RCPT)** program stresses research, live labs and interactive sessions on emerging security findings, offering the scope for defining the information security requirements while finding options to enhance existing methodology assets. The RCPT certification is designed and embedded as part of **Advanced Ethical Hacking** module in the Master of Science in Cyber Security programme, to allow the students to have an industry-standard exposure towards penetration testing as well as an opportunity to upskill themselves in real-life scenarios and simulations through the offered CyberLabs. As such, every student in the programme is given equal opportunity in getting their hands on the certification as part of the syllabus learn in the module without the need of taking up additional training resources. Studen can opt for the Rocheston certification which is valid for 2 years and subject to a renewal process to ensure all Penetration Testers are updated with the current scope of Penetration Testing.

Certified Hacker Forensics Investigator (CHFI)

Upon completion of the **Advanced Digital Forensics** module, students will be ready and may opt for the **Certified Hacker Forensics Investigator (CHFI)** professional certification. The CHFI certification is provided by the International Council of Electronic Commerce Consultants [EC-Council], which is an American organisation that offers cybersecurity certification, education, training, and services in various cybersecurity skills. EC-Council is d headquartered in Albuquerque, New Mexico, and has certified over 237,000 professionals from 145 countries (https://iclass.eccouncil.org/). CHFI is an advanced cybersecurity certification for forensic network security investigators.
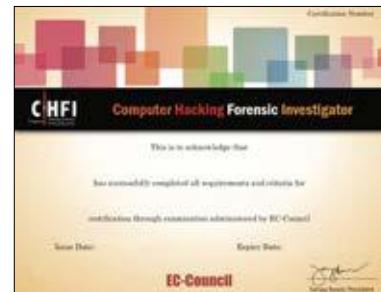

Certified Security Operation Centre Analyst (CSOC)

Upon completion of the **Security Operations Center (SOC) & Incident Response** SOC module, students will be ready and may opt for the **Certified Security Operation Center (CSOC)** professional certification. The CSOC examination is certified by the Global ACE Certification where the certification body for the Global ACE Certification is the Information Security Certification Body or ISCB, a department within CyberSecurity Malaysia (CSM). Candidates can take the examination at authorised examination centres in participating member countries. Candidates who have successfully passed the CSOC examination will be eligible to apply as an associate or professional member by fulfilling the membership criteria defined under the Global ACE Certification.

Global Cybersecurity Skill Shortage + Increased Budgets
=
CAREER OPPORTUNITIES

Source: https://cybersecurity.isaca.org/newsroom

United States
- 79% feel hands-on experience is most important when evaluating job candidates
- 79% feel technical skills in intrusion detection are most scarce
- 36% feel technology can somewhat compensate for a skills shortage

Mexico
- 38% require a master's degree as a minimum credential for entry-level positions
- 80% feel educational programs are not fully preparing cyborsecurity professionals
- 78% feel technical skills in software development are most scarce

France
- 84% feel their government is not investing enough in cybersecurity skills
- 83% believe there is a shortage of cybersecurity skills in their country
- 33% believe education programs fully prepare cybersecurity professionals

Australia
- 42% believe educational programs are fully preparing cybersecurity professionals
- 80% feel technical skills in attack mitigation are the most scarce
- 62% feel experience working for a competitor is important when evaluating job candidates

Source: https://newsroom.intel.com/news-releases/global-study-reveals-businesses-countries-vulnerable-due-shortage-cybersecurity-talent/#gs.qc3z9r

Malaysia needs
20,000 cybersecurity knowledge workers by 2025.
- Datuk Dr. Amirudin Abdul Wahab, CEO of CyberSecurity Malaysia

The global cybersecurity market size is forecasted to grow to
248.26 BILLION
U.S. dollars by 2023

"**Malaysia is one of the top three ASEAN countries that are expected to contribute 75 per cent of cybersecurity services market share by 2025.**"

- Gobind Singh Deo, Minister of Communications and Multimedia
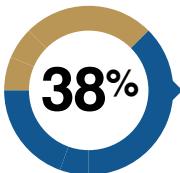

38% **require a master's degree as a minimum credential for entry-level positions.**
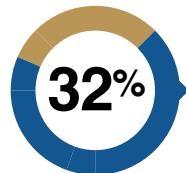

32% **takes 6 months or more to fill cybersecurity jobs in their organisation.**

DEMAND INCREASING FOR SKILLED PROFESSIONALS
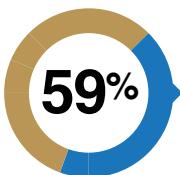

59% **The number of security professionals who say that fewer than half of job candidates were considered "qualified upon hire" has risen from 50% to 59% in a year.**
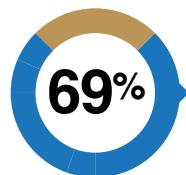

69% **say their cybersecurity teams are understaffed.**

The **FINANCIAL SERVICES INDUSTRY** sees the highest cost from cyber crime. It costs the average business
$18.3 MILLION

Ransomeware attacks are growing more than
350 PERCENT ANNUALLY

"As digital transformation agendas continue to dominate, a bigger cybersecurity budget is necessary. Almost all companies are looking at technologies such as robotics, machine learning, artificial intelligence, blockchain and so on. All of that change will come with additional cyber risks and necessary investments."

- Mike Maddison, EY EMEIA Cybersecurity Leader

"Organisations were facing difficulties in hiring talents with 32% of these take 6 months or more to fill cybersecurity jobs."

- Information Systems Audit and Control Association (ISACA) 2019

"Both the government and the private sector are scrambling for talent. Thousands of information-security jobs are going unfilled as the industry in the U.S. struggles with a shortage of properly trained professionals. By one estimate, there will be 3.5 million unfilled cybersecurity jobs by 2021."

Master of Science in **CYBER SECURITY**

(R/0613/7/0019)(05/29)(MQA/FA11934)

DUAL DEGREE

Duration:
Full-time   - 1+ years
Part-Time - 2.5-3 years

This programme is specifically designed to provide:

- Opportunity for professional development at an advanced level within the area of Cyber Security.

- Ability to further develop specialisation gained in taught modules through an extensive research-based and/or technical-based dissertation, to prepare a subject matter expert in the field.

- APU is also poised to become a frontrunner in cyber security research through the establishment of the Forensics and Cyber Security (FSEC) Research Centre, through which research activities will be undertaken to challenge boundaries in the application of cyber security.

Career options
- Security Architect
- Cyber Security Analyst / Consultant
- Information Security Analyst
- Cyber Security Incident Response Consultant
- Digital Forensic Investigator
- Cyber Security Engineer
- Information Security Engineer
- Cyber Security Manager
- Information Security Manager

Certification by:

The Benefits of the Programme

- The curriculum covers a wide range of industry relevant subject areas in Security Operations Centre (SOC) and Incident Response, Security Auditing and Assessment, Advanced Ethical Hacking, E-Investigation, Data Analytics in Cyber Security etc.

- External reviews conducted by Cyber Security Malaysia (CSM), KPMG and F-Secure during the development of the programme curriculum.

- Programme Support by an Industry Advisory Panel involving cyber security experts from Cyber Intelligence, Cyber Test Systems, Akati Consulting Group and Cyber Security Malaysia (CSM).

- A fully-functional Security Operations Centre (SOC) that allows students to have hands-on cybersecurity operations platform to monitor live data which allows them to perform real-time cyber security monitoring to fortify network defense with global threat intelligence and launching faster response on cyber security incidents.

- A full-fledged Cyber Threats Simulation and Response Centre – Cyber Range is also included within the Cyber Security Talent Zone in APU. Cyber Range incorporates latest technologies and a military grade cyber-defence system, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens.

- A technical project related to Cyber Security as dissertation in the final semester.

- Research opportunities for students via APU's Forensic and Cyber Security Research Centre - FSEC.

Who Should Attend

This programme is geared towards practicing IT/ Computing professionals within industry who seek further formal qualifications in Cyber Security. In addition, professionals and managers who wish to enhance themselves with Cyber Security knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Cyber Security/ Digital Forensics background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)
- Programming in Python
- Database for Data Science
- Digital Forensics and Cyber Security Tools

Core Modules:
- Data Analytics in Cyber Security
- Information Security Design
- Cyber Security & Threats
- Security Operations Center & Incident Response
- Advanced Ethical Hacking
- Advanced Digital Forensics
- Research Methodology in Computing & Engineering
- Project Paper

Elective Modules (Choose 3)*
- E-Investigation
- Network Design & Performance
- Information Security Architectures
- Security Audit and Assessment
- Applied Scripting in Cyber Security

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

As part of this course, you are expected to complete an extensive project paper in relation to Cyber Security for both academic and industry purposes. This project paper will be supervised by a member of academic staff as the main supervisor. It may involve working with an external organisation (probably directly relevant to your work or organisation or any of our industry partners). You are given considerable flexibility in choosing any Cyber Security related topics to base your project paper. As for the deliverables, you are required to come up with a prototype/ simulation/ framework etc. (the list is just an example and not limited to only these) and to produce one project paper and a publishable conference/ journal paper consists of summary of the work.

MSc in Data Science and Business Analytics

BIG DATA - Don't miss the opportunity to be part of the GLOBAL WAVE

Joint Professional Certification by TIBCO Software Inc.

Upon completion of the MSc in Data Science & Business Analytics programme, in addition to their Masters Degrees, students will receive a professional certificate from TIBCO Software Inc. TIBCO is amongst the global leaders in Integration, Data Management and Analytics platforms that has a global clientele. In addition to the certification, TIBCO, as APU's industry partner, has provided all students & lecturers with complimentary access to the TIBCO Spotfire software for academic purposes. Students are utilising the software to perform tasks & projects related to data analytics.

The rise of Data Science needs will create roughly

11.5 Million
Job openings by 2026

28% of big data job adverts are in banking and finance

21% higher salaries for big data staff over permanent non-big data staff

$

Highest Paid Jobs

The White House administration is investing

$200 MILLION into big data research projects

BIG DATA IS projected to grow into a **$53.4 Billion** market by 2017, up from **$10.2 Billion in 2013**

1,350,000,000 Google search results for "What is big data?"

## Data Science @ APU - FORTIFIED through PARTNERSHIPS

The programme has been carefully designed by APU with inputs and content from our partners, comprising major technology and software solutions providers, university partners as well as industry organisations who use analytics for strategic and competitive advantage.

The strength of these partnerships ensures that the programme comprehensively addresses all key stakeholders – Technology providers, Employers, Government as well as Students – in its learning outcomes, curriculum content, delivery and assessment. Students also obtain certification jointly issued with industry partners, which would certainly give them a head start in the exciting world of Big Data.

Furthermore, APU is also poised to become a frontrunner in analytics research through the establishment of the Asia Pacific Centre of Analytics (APCA), through which research activities will be undertaken to challenge boundaries in the application of analytics.

Graduates from this programme will not only gain an academic qualification from APU, but would also automatically attain a Globally Recognised Professional Industry Certification from SAS. Along the way, graduates would also gain exposure to industrial workshops led by experts from the industry, providing a valuable gateway into future careers.
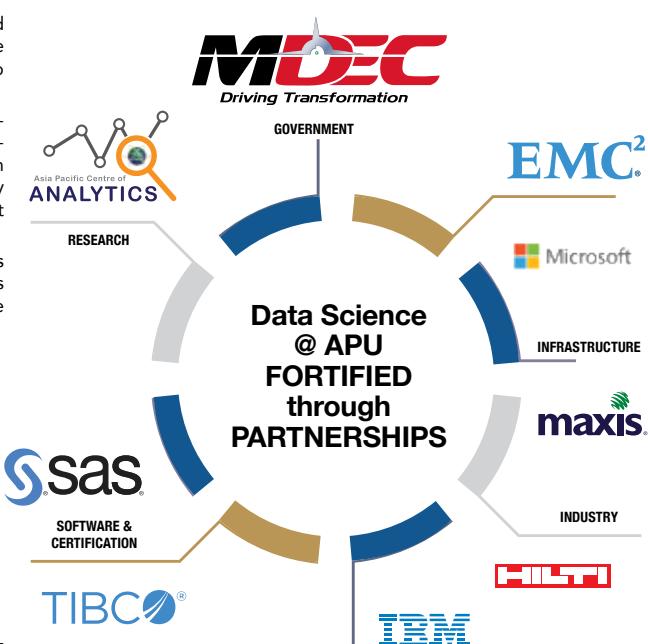

MSc in **DATA SCIENCE AND BUSINESS ANALYTICS**

(R2/0614/7/0007)(10/30)(MQA/FA8020)

Duration:
Full-time   - 1+ years
Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Knowledge and applied skills in data science, big data analytics and business intelligence.
- Overall understanding of the impact of data science upon modern processes and business.
- Exposure towards data science tools and techniques, as well as methods of data collection and utilisation, to turn data into useful information via various processes.

Career options

- Data Engineers
- Data Analyst
- Business Analyst
- Data Scientist
- Chief Technology Officer (CTO)
- Data Analytics Manager
- Business Analyst Manager
- Data Innovation Manager
- Machine Learning Scientist
- Business Process Engineer
- Data Wrangler / Munger / Miner
- Business Intelligence Manager
- Analytics & Reporting Manager
- Decision Analytics Manager
- Data Architect

The Benefits of the Programme

- In addition to the degree award, a Joint Professional Certification will be offered by SAS Institute, USA.
- 30% of the curriculum will allow for mini projects assessed as in-course work allowing for practical skills development in Data Analytics.
- The curriculum covers a wide range of subject matter from Analytical Technologies, Exposure to tools such as R & SAS Modelers, Data Visualisation, Customer/User Behavioural Studies, Forecasting Methods and to Presenting the Business Intelligence reports.
- External Programme Annual Reviews by International University Partners.
- Programme Support by an Industry Advisory Panel involving data analytical experts from Petronas ICT, RedTone, SharePoint, CyberSecurity Malaysia, Maxis, IBM, Microsoft, Fusionex and Axiata.
- Research opportunities via APU's Centre of Analytics - APCA.

Who Should Attend

This programme is designed to provide students with knowledge and applied skills in data science, big data analytics and business intelligence. It aims to develop analytical and investigative knowledge and skills using data science tools and techniques, and to enhance data science knowledge and critical interpretation skills. Students will understand the impact of data science upon modern processes and businesses, be able to identify, and implement specific tools, practices, features and techniques to enhance the analysis of data.

Modules & Project

This programme comprises 11 coursework modules and a Capstone Project (2 parts). There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 1 pathway (3 specialisation modules).

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)
- Programming in Python
- Database for Data Science
- Statistics

Core Modules
- Big Data Analytics & Technologies
- Data Management
- Business Intelligence Systems
- Research Methodology for Capstone Project
- Applied Machine Learning
- Data Analytical Programming
- Multivariate Methods for Data Analysis
- Advanced Business Analytics and Visualisation
- Capstone Project 1
- Capstone Project 2

Specialisation Modules*
(Choose 1 Pathway only)

Pathway 1 (Business Intelligence):
- Behavioural Science, Social Media and Marketing Analytics
- Time Series Analysis and Forecasting
- Strategies in Emerging Markets
  OR Multilevel Data Analysis
  OR Operational Research and Optimization

Pathway 2 (Data Engineering):
- Cloud Infrastructure and Services
- Deep Learning
- Natural Language Processing
  OR Building IoT Applications
  OR Data Protection and Management

* Specialisation modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

TIBCO certification is awarded to students who complete:
- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

Master of Science in
DIGITAL TRANSFORMATION

(N/0688/7/0001)(08/28)(MQA/FA16559)

Duration:
Full-time - 1+ years
Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Graduates with knowledge, skills, and competencies that will help in the development of the country and enable them to progress their careers in digital transformation.

- An understanding of digitally connected systems in organizations that automate manual tasks, streamlining workflows, enhancing efficiency, and improving customer experience.

- An opportunity to develop capabilities in implementing digital transformation initiatives effectively, empowering organisations agility and innovation to quickly respond to customer and competitor demands.

- A comprehensive knowledge in identifying digital technologies, their applications in various industries, and leadership qualities.

Career options
- Digital Transformation Specialist
- Digital Transformation Manager
- Digital Transformation Consultant
- Data Transformation Officer
- Chief Digital Officer (CDO)
- Chief Technology Officer (CTO)
- Digital Transformation Director
- Director of Digital Strategy
- Head of Strategy and Transformation
- Digital Transformation Lead
- Digital Transformation Programme Integrator
- Digital Project Manager

The Benefits of the Programme

- Develop skills to conduct business consultation in digital transformation projects by engaging with customers and understanding their needs.
- Apply the concepts in technologies relevant to industrial revolution 4.0 to develop or redesign new business processes that can improve productivity and efficiency while preparing companies for AI adoption.
- Master design thinking principles on change management to build strategic working relationships and meet potential customers expectations.
- Examine digital engagement platforms requirement in meeting customers needs.
- Analyse business trends in digital platforms to grow new business or cross sell additional products or services.
- Prepare students who are not from a computing background to develop the necessary knowledge to undertake digital transformation projects within their expertise.

Who Should Attend

This programme is geared towards industry or business professionals who are seeking to develop their careers in the digital transformation for the benefit of organisations. Managers within organisations where information technology plays a vital role in the managerial functions and the efficient operation of the organisation will find this programme very useful.

For business managers who want to leverage on power of cloud services to increase efficiencies in business operations, they will learn different digital transformation frameworks and decide on the ones most applicable to their industries. Though they may not have any IT background, pre-requisite modules in key areas of AI, programming and internet of things will be taught to help them navigate the IT landscape.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed).

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)
- Programming in Python
- Database for Data Science
- Fundamentals in Artificial Intelligence

Core Modules
- Business Intelligence Systems
- Disruptive Innovation Strategies
- Technology, Culture and People: A Global Perspective
- Leading Digital Business Transformation
- Digital Project Management
- IR 4.0 Enabling Technologies
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*
- Building IOT Application
- Financial Technology
- Cyber Security & Threats
- Big Data Analytics and Technologies

> * Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete an industry-based major project where possible, however the emphasis must be placed on an effective demonstration of how the application of digital transformation can be part of the business environment. It is expected that the project would devise, recommend, or implement innovative solutions to the problem areas.

MSc in **INFORMATION TECHNOLOGY MANAGEMENT**

DUAL DEGREE

(R/0611/7/0012)(07/27)(MQA/FA8835)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- An opportunity to demonstrate how the application of computer-related technology is an integral part of an efficient business environment.
- An emphasis on the understanding of how an effective computer system is a key factor in enabling a business to gain a competitive and strategic edge.
- An overall consideration of how IT can be managed in the organisation.
- An understanding of how strategic IT frameworks can be established to enhance the capability of the organisation.

Career options

- Senior IT Consultant
- IT Recruitment Consultant
- IT Manager
- IT Project Manager
- Technical Support Manager
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- IT Infrastructure Manager
- Innovation Manager
- IT Director

CMI Chartered Management Institute
ACCREDITED

MD™ Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Demonstrate professional competencies in one or more specialist branches of IT Management.
- Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.
- Communicate effectively in technical and professional environments.
- Show initiative and independence of thought in technical project planning and design.
- Appreciate how an efficient technology-based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Demonstrate a critical awareness of the importance of IT in the development of systems.
- Develop an appreciation of the management context within which software and IT systems are developed.
- Critically analyse, design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of an IT management environment.

Who Should Attend

This programme is geared towards industry or business professionals who are seeking to develop their careers in the management of technological systems and/or their production for the benefit of organisations. Managers within organisations where information technology plays a vital role in the managerial functions and the efficient operation of the organisation will find this programme very useful.

Modules & Project

This programme comprises 10 coursework modules and a Project.

There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Programming in Python
- Database for Data Science
- Systems Development Methods

Core Modules
- Managing Software Development Projects
- Technology Management
- Digital Execution
- Strategic Planning and Systems Development
- Business Intelligence Systems
- Research Methodology in Computing and Engineering
- Managing Organisations
- Project Paper

Elective Modules
(Choose 1)*
- Internet Applications
- Enterprise Applications

(Choose 2)*
- Information Security Architectures
- Network Design & Performance
- Data Management

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete industry-based major projects where possible, however the emphasis must be placed on an effective demonstration of how the application of computer-related technology can be part of the business environment. It is expected that the project would devise, recommend or implement innovative solutions to the problem areas.

Master of **TECHNOLOGY MANAGEMENT**

(R/0414/7/0107)(06/27)(MQA/FA8837)

Duration:
Full-time - 1+ years

This programme is specifically designed to provide:

• An opportunity to understand and appreciate the combination of technology with management.

• A platform to produce capable managers who can effectively manage the dynamic changes that technology makes at all levels.

• An understanding of the needs of management in decision-making.

• An overall appreciation of the manner in which an organisation's strategic business plan drives its technology strategy and infrastructure.

Career options
• Business IT Consultant
• BPR Manager
• Business Strategy Consultant
• Chief Technology Officer (CTO)
• Chief Information Officer (CIO)
• Product Manager
• IT Manager
• IT Project Manager
• IT Consultant
• System Analyst
• Technology Consultant

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

• Demonstrate professional competencies in one or more specialist branches of Technology Management.

• Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.

• Communicate effectively in technical and professional environments.

• Show initiative and independence of thought in technical project planning and design.

• Appreciate how an efficient technology-based infrastructure is a key factor in enabling a business to gain a competitive edge.

• Illustrate how technology can support strategies to enhance corporate goals.

• Critically analyse, design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of a technology management environment.

Who Should Attend

This programme is geared towards graduates from technical programmes such as engineering and computer science who wish to master managerial skills that are relevant to their background. This programme also appeals to non-technical managers and executives who are increasingly required to manage technology and technical personnel as part of their managerial responsibilities. Graduates seeking senior management careers in high technology or technology intensive businesses are also encouraged to enroll in this programme.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 2 elective modules from those listed).

Pre-Requisite Modules (For Non-Business Students)
Duration: 1 month (Full-time)
• Managing People
• Understanding Customers
• Managerial Finance
• Business Environment & Strategic Planning

Core Modules
• Managing Creativity and Innovation
• Business Intelligence Systems
• New Product Development & Innovation
• Statistical Decision Making
• Research Methodology in Computing and Engineering
• Technology Management
• Technology, Culture and People : A Global Perspective
• Entrepreneurship in Asia
• Project Paper

Elective Modules (Choose 2)*
• Digital Execution
  OR Data Management
• Strategic Marketing Management
  OR Marketing and Sustainability in the Age of Globalisation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete industry-based major projects where possible, however the emphasis must be placed on an effective demonstration of how the application of computer-related technology can be part of the business environment. What sets APU's MBAi apart?

- Global Relevance: Explore AI's transformative impact across industries like healthcare, finance, retail, and manufacturing.
- Future-Ready Skills: Master predictive analytics, recommendation systems, AI-driven marketing, and intelligent automation.
- Career Versatility: Prepare for roles such as AI Strategy Consultant, Chief AI Officer, or Digital Transformation Lead.
- Innovation-Driven Learning: Tackle ethical challenges, lead AI adoption, and unlock new business models through AI.

This is more than an MBA — it's your launchpad into the future of intelligent business leadership.

Master of **BUSINESS ADMINISTRATION**
WITH A SPECIALISM IN
OIL AND GAS MANAGEMENT

(R/0414/7/0094)(06/27)(MQA/FA8762)

DUAL DEGREE

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- A strong foundation in core management principles, integrated with specialised modules focused on the oil and gas industry.
- The ability to generate data-driven insights and apply strategic thinking to solve real-world business challenges in the oil and gas sector.
- In-depth understanding of the technical, economic, and regulatory dynamics that shape the global oil and gas landscape.
- Leadership capabilities and a comprehensive grasp of best practices, preparing graduates to take on senior roles within the oil and gas industry.

Career options

- Energy Project Manager
- Supply Chain & Operations Manager
- Corporate Strategy Analyst
- Environmental Manager/Consultant
- Economist or Financial/Risk Analyst
- Oil & Gas Finance Analyst
- Business Development Manager
- Energy Technology Consultant
- Upstream Manager
- Corporate Strategy Manager (Energy Sector)

CMI Chartered Management Institute

ACCREDITED

MD Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

Upon successful completion of this programme, you will be able to:

- Gain a competitive edge in the job market with specialised skills tailored to the oil and gas industries.
- Develop, manage, and optimise oil and gas operations while leveraging advanced technologies to improve efficiency and reduce costs.
- Apply industry-specific tools and techniques, including data analytics, digital transformation technologies, and sustainable energy practices.
- Design and implement effective strategies for oil and gas exploration, production, and distribution to maximize value while ensuring regulatory compliance.
- Prepare for leadership roles in both local and global oil and gas organisations, equipped with strategic, technical, and management expertise.
- Exhibit innovative problem-solving skills tailored to address unique industry challenges, such as resource management, environmental concerns, and market fluctuations.
- Demonstrate strong analytical and decision-making capabilities to support strategic planning and execution within the context of the oil and gas sector.

Who Should Attend

This programme is designed for managers and professionals aiming to advance their careers into senior managerial or executive roles within the oil and gas industry by acquiring advanced knowledge and leadership skills. An MBA in Oil and Gas Management is a specialised MBA designed to equip professionals with the strategic, operational, and financial skills needed to manage and lead in the global energy industry — especially in sectors related to exploration, production, refining, trading, and sustainable energy transition. It is also well-suited for individuals looking to transition into the energy sector, or those interested in managing or starting their own business within the oil and gas industry, providing a solid foundation in both business management and industry-specific practices. This programme is also ideal for those passionate about optimizing operational efficiencies and navigating the regulatory complexities within the energy sector. It offers the opportunity to engage with real-world challenges while leveraging global business opportunities in the oil and gas landscape.

Modules & Project

This programme comprises 13 coursework modules and a Project. There are 10 compulsory Core Modules (including Research Methodology module) and 3 specialisation modules.

Pre-Requisite Modules (For Non-Business Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Managing People

Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

POWER of Analytics and Data Driven Marketing

Master of Science
Digital Marketing

Marketing has always been about how to reach (and sell to) an audience. What has changed with technological changes, is where you find that audience. In the digital marketing industry, quotes often encapsulate the essence of product or service, customer experience, building customer relationship, and the importance of creativity and innovation. As a marketer, your job is never to "push a product onto an unwilling consumer." Instead, it's about understanding your audience thoroughly enough to craft messages, experiences, and campaigns that seamlessly connect their needs/pain points to your product.

> **"Digital marketing is not the art of selling a product. It is the art of making people buy the product that you sell."**
>
> *- Hecate Strategy*

Master of Science in **DIGITAL MARKETING**

DUAL DEGREE

(R2/0415/7/0006)(03/27)(MQA/FA0760)

- Chief Financial Officer (CFO)

CMI Chartered Management Institute

ACCREDITED

MD™ Premier Digital Tech Institution

(R2/0411/7/0006)(04/29)(MQA/FA3458)

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Demonstrate a coherent and advanced understanding of the concepts, principles of accounting, its applications and financial workings, and also the application of such understanding in using those financial assets to the real world of business and investment.
- Describe and comment on advanced scholarship in accounting and finance and critically evaluate arguments and assumptions to make judgments.
- Demonstrate the ability to recognise and appropriately respond to ethical issues in the practice of accounting by incorporating appropriate professional codes of conduct and social responsibility.
- Use oral, written and electronic communication to elicit information, to explain, debate and present complex arguments, knowledge and rationale to different audiences and circumstances.
- Gather, interpret, evaluate, analyse and apply relevant professional standards to complex accounting-related issues, and come to well-reasoned conclusions.
- Demonstrate a commitment to life-long learning and professional development by reading and critically appraise management theory.

Who Should Attend

This programme is specially designed for enhancing the current group of accounting graduates or practitioners who may need to further advance, improve their fundamental understanding of the accounting profession and the market needs from the academia perspective. It is a process of preparation as well as upgrading their skills.

Modules & Project

This programme comprises 13 coursework modules (including Research Methodology module) and a Project.

Pre-Requisite Modules (For Non-Accounting Students)
Duration: 1 month (Full-time)
- Cost Accounting Fundamental
- Financial Accounting Fundamentals 1
- Financial Accounting Fundamentals 2

Modules

- Quantitative Methods for Decision Making
- Managerial Finance
- Management Accounting for Decision Making
- Management Control and Audit
- Financial Accounting and Reporting
- Taxation
- Financial Reporting and Analysis
- Forensic Accounting and Fraud Examination
- Accounting Information Systems
- Research Methodology
- Ethical Obligation in Accounting
- Accounting for Islamic Financial Institutions
- Business Law
- Project

Project

You will be expected to engage in comprehensive research through a critical review of published material relevant to Accounting. Thorough review is carried out on theoretical and empirical literature from which a conceptual or theoretical framework is derived. Sources of literature will range from academic papers, business case history and consultancy reports. Existing theories and research findings will be utilised to create solutions or opportunities to address challenges in today's international business climate. Identification of such opportunities or challenges will be important factors in modern business strategies and planning. Business case history will be utilised to research and analyse either the strategies of an organisation or the application of specific concepts, theories or techniques as well as analyse the effectiveness and outcomes. The consultancy reports will be utilised to examine contemporary problems faced by one or more organisations and to recommend strategies and actions to be taken by the organisation(s). Case study would be the core focal point of content delivery for this course.

Master of **ACCOUNTING IN FORENSIC ANALYSIS**

(R2/0411/7/0007)(04/29)(MQA/FA3459)

DUAL DEGREE

Master of Finance
with a specialism in FinTech

FINTECH FOR THE FUTURE

Financial Technology (FinTech) is gaining momentum year-on-year and creating a huge demand for professionals with specific FinTech skills. Traditional accounting and finance industry is getting digitally transformed. To cater to the skill gap in the Financial Services the technology application has become an essential part of the graduate skill.

Traditional financial institutions and FinTech start-ups alike are looking for more candidates who specialise in Artificial Intelligence, Machine Learning, Data Science. According to Bloomberg reporting and data from LinkedIn[1], job listings requiring these skills in the financial services industry increased nearly 60% in the past year. APU Master of Finance (FinTech) programme is designed to cater to the increased demand for finance graduates with FinTech skills.

FUTURISTIC:
[ADVANCEMENTS]

Powered by

FINTECH

"FinTech is massively popular. 96% of global consumers are aware of FinTech-driven money transfer and payment services. 3 out of 4 consumers have used an alternative money transfer and payment service."

- EY Global FinTech Adoption Index

FINTECH FOR THE FUTURE

60%
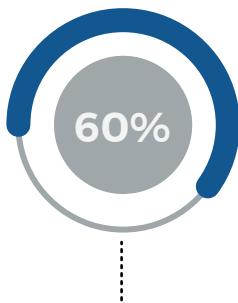

60% of consumers want to transact business with financial institutions with a single platform, such as social media or mobile banking apps. **(Ernst & Young)**

28%
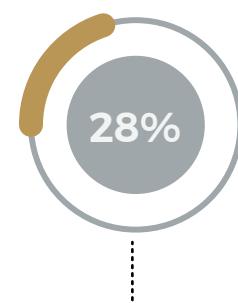

"Global FinTech market investments have seen a 28% year-on-year rise from 2018 to 2019." **(Tranglo)**

82%
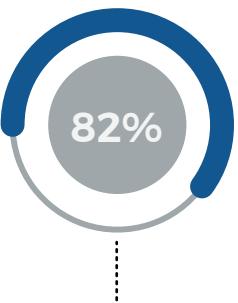

In 2017, 88% of incumbent financial institutions feared that they would lose money to the disruptive innovation of FinTech companies, but 82% plan to partner with FinTech startups in the next 3–5 years. **(PwC)**

64%
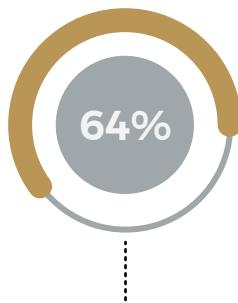

In 2019, 64% of consumers worldwide have used one or more FinTech platforms, up from 33% in 2017. **(Ernst & Young)**

> "Financial institutions are becoming more technology focused. We see it as the evolving intersection of financial services and technology. Looking forward, we expect FinTech disruptors to continue to expand into other areas within financial services."
>
> — Pricewaterhouse Coopers (PwC)
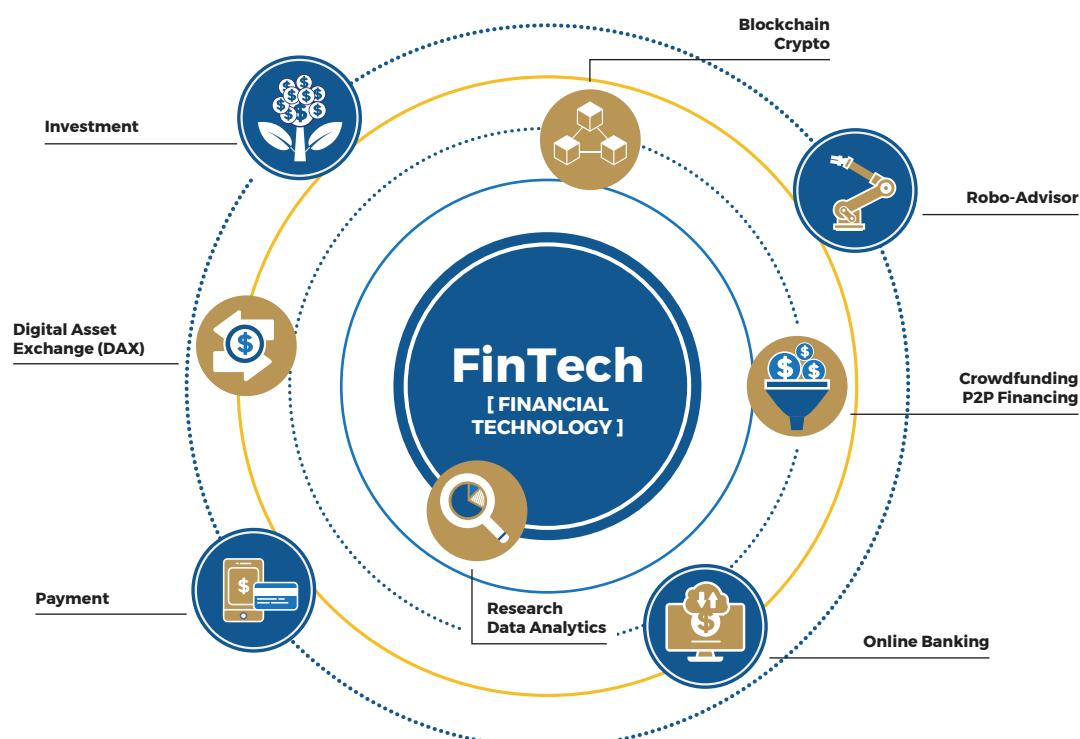

> "FinTech is changing businesses and customers rapidly. Those that embrace FinTech will stay at the forefront of their markets; those that don't will lose out on opportunities, customers, and market share."
>

- Project

Project

You will be expected to conduct effective research in relation to FinTech for both academic and industrial purposes. The project will provide you with an opportunity to study a topic related to FinTech in the form of a written report. You are required to develop your chosen research study by conducting literature reviews, engaging with research methodology, developing skills in data collection and analysis. At the end of the study, you will produce and present a report conforming to the conventions of academic writing.
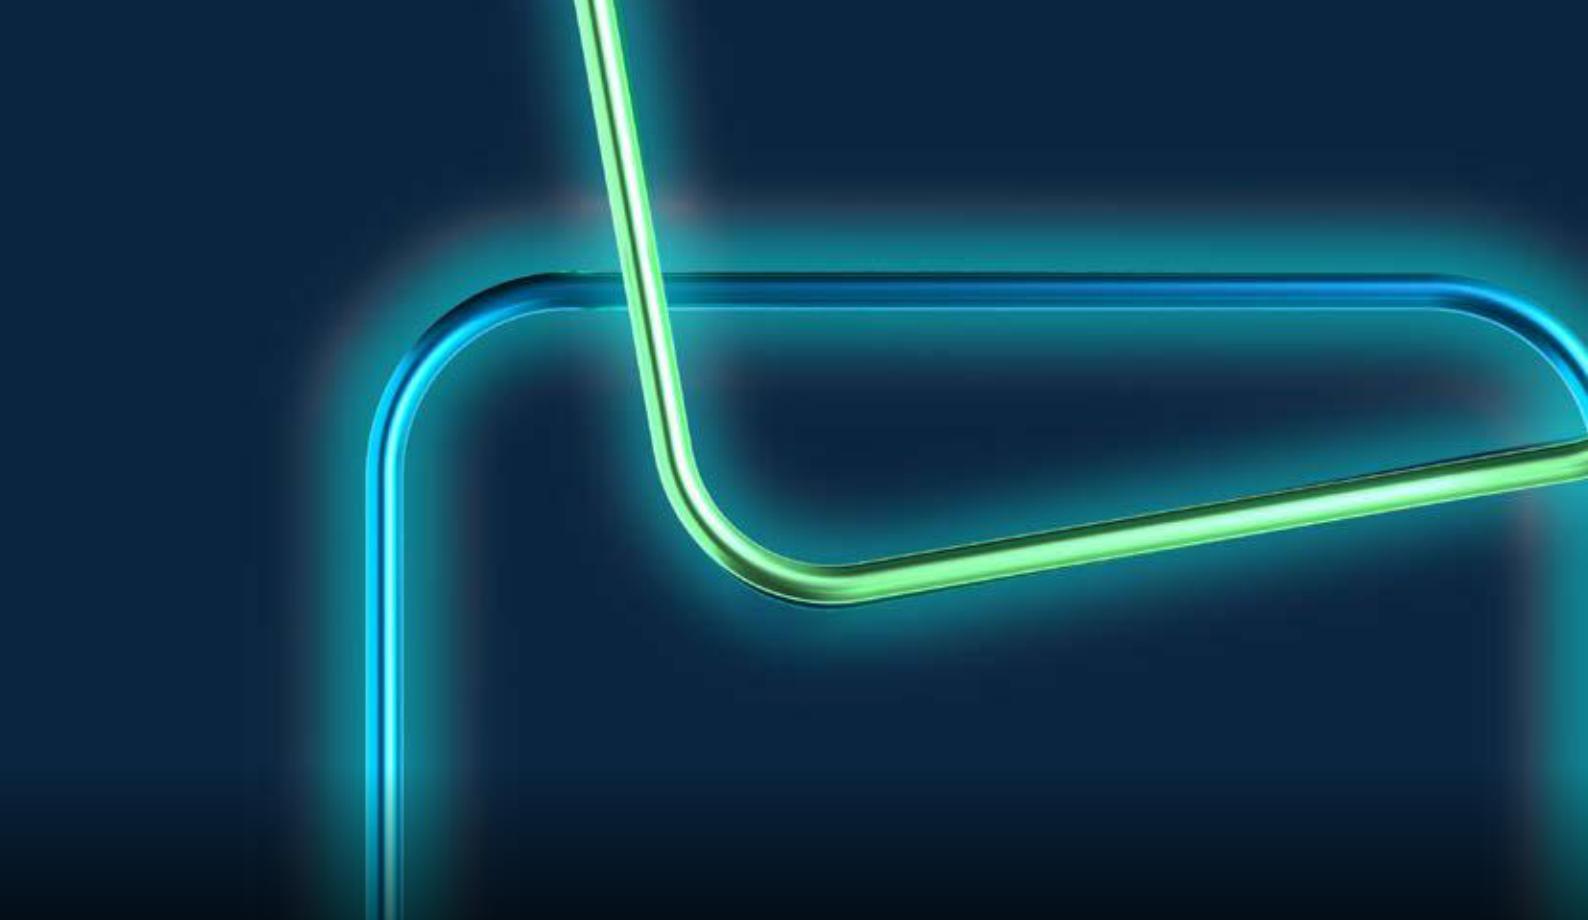

Master of Arts in Design Innovation Management

The Masters of Arts in Design Innovation Management programme will enhance graduates managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner, to enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world of today.

Skills Gain

01	02	03	04	05	06	07	08	09
Strategic Sighted	**Cross-industry Experience**	**Fast and Furious**	**Optimistic**	**Curious**	**Willing to Change**	**Able to Manage Failure**	**Project Oriented**	**Business Case Oriented**
Ability to insipire others with a clear vision	Mixed background in multiple industries (the best ideas emerge when different views collide)	Willingness to find short-cuts; done is better than perfect	Obstacles are just triggers for change	Willingness to deep dive into new domain	Willingess to take the first steps and to inspire others to follow	Ability to make others aware that the future is always uncertain	Project Management Skills in order to follow multiple innovation projects	Ability to work with a brieflist of assumptions

Diagram adopted from Board of Innovation.com

Master of Arts in **DESIGN INNOVATION MANAGEMENT**

(R/0288/7/0001)(05/31)(MQA/FA14558)

Duration:

Full-time   -   1+ years

This programme is specifically designed to:

- Extend design innovation management programme to different organisations that consider design to be a strategic competitive force.
- Meet the growing demand for advanced skills in design management and leadership in the various services and business.
- Prepare graduates to meet the growing needs for management of advanced design technology and implementation of new management approaches.

Career options

- Project Manager
- Design Producer
- Brand Manager/ Strategist
- Marketing Manager
- Product Manager
- Account Manager
- Client Manager
- Chief Design Officer
- Design Researcher
- Design Strategist
- Service Designer/ Design Experience Strategist
- Venture Architect

The Benefits of the Programme

- Innovation and management from a creative perspective, within a world-leading art and design institution with strong link to the creative industries.
- Apply Design Thinking to real-world challenges, design collaboratively, engage critically and creatively with others and learn from shared experiences.
- An interdisciplinary programme informed by theories drawn from a range of design, business and humanities areas and delivered through projects and collaborations.
- Gain insight into creative briefs, target audiences and markets, through Design Management and Innovation.
- Benefit from diverse potential employment routes including setting up your own business, in-house and external design leadership roles, cultural positions and agency management jobs.

Who Should Attend

This programme is geared towards graduates who have graduated from design backgrounds who wish to master managerial skills that are relevant to their previous experience. This programme also appeals to non-design field managers and executives who require design management skills as part of their managerial responsibility.

Modules & Project

This programme comprises 9 coursework modules and a Creative Futures Project. There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 1 elective module from those listed).

Pre-Requisite Modules (For Non-Related Students)
Duration: 1 month (Full-Time)
- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Core Modules

- Design and Creative Industries
- Business Planning for Creative Entrepreneur
- Research Methodology
- Design Thinking
- Integrated Brand Management
- Future Media Innovation
- Service Design
- Project Feasibility Study
- Creative Futures Project

Elective Modules (Choose 1)*

- Intellectual Property
- Creative Sustainability
- Technology Management
- Design for Retail
- Managing Business Web Presence

  * Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Creative Futures Project

For the final project module named Creative Futures Project, you will need to complete an industry-based major projects along with evidence and output related to the Design Innovation Management field. There will be a final exhibition and presentation towards the end of the course.

Framework adopted from Design Innovation Framework Diagram

This programme will enhance graduates' managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner. This enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world today.

CMI Chartered Management Institute ACCREDITED

MD Premier Digital Tech Institution

Master in **DIGITAL COMMUNICATION**

DUAL DEGREE

Duration:
Full-time   - 1+ years
Part-time   - 2.5-3 years

This programme is specifically designed to provide:

- A broad and extensive knowledge of international and intercultural communication.
- An overall understanding on how culture affects communication.
- The ability to conduct an interdisciplinary analysis of business communications in an international environment.

Career options

- Digital Content Specialist
- Digital Media Designer
- Digital Media Specialist
- Social media campaign advisor
- Digital Communication Manager
- Interactive Content Developer
- Digital Communications Strategist
- Corporate Communications Manager
- Senior Digital Content Strategist
- Multimedia Content Producer
- Digital Storytelling Specialist
- Social Media Manager
- Social Media Intelligence Analyst
- Influencer & Creator Relations Manager

MD
Premier Digital Tech Institution

POWER of Analytics and Data Driven Marketing

(N/0323/7/0024)(07/30)(MQA/PA18240)

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

Upon successful completion of this programme, you will be able to:

- Evaluate complex communication scenarios to develop creative, innovative and effective strategies and solutions using digital communication.
- Work across many industries with the digital communication skills that are applicable to various media forms such as social media, data analytics, artificial intelligence and visualisation.
- Develop a deep understanding of the digital creative economy and how platforms and artificial intelligence are transforming the media and communication environment.
- Demonstrate good leadership quality and personal skills in implementing effective communication strategies and recognize the need of life-long learning and professional development for successful career advancement by keeping abreast with emerging trends, technologies, and best practices in the communication landscape.
- Demonstrate entrepreneurship skills and professionalism in implementing effective communication strategies taking into consideration social responsibilities, cultural and ethical aspects of the communication landscape.

Who Should Attend

The Master in Digital Communication is designed for individuals who are eager to develops future-focused specialised skills and advanced knowledge in digital communication as well as an applied understanding of the digital creative economy and how digital platforms are transforming the global media environment. The programme provides opportunities to people who want to learn how to adapt to new technologies and platforms to advance their careers such as able to analyze and apply communication methods in high-performance systems and able to create engaging content for different digital mediums.

Modules & Project

This programme comprises 10 coursework modules (including Research Methodology module) and a Project.

Pre-Requisite Modules (For Non-Media & Communication Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Fundamentals of Communication
- Media Theories

Core Modules
- PR Strategies
- Communication Theory and Practice
- Global Communication Competencies
- Digital Campaigns Management
- New Media Industries and Technologies
- Statistical Decision Making
- Research Methodology
- Digital Media Analytics
- Behavioural Science, Social Media & Marketing Analytics
- Project

Elective Core Modules
- Marketing and Sustainability in the Age of Globalisation **OR** Design Thinking
- Managing Crisis Communication **OR** Managing Business Web Presence

Project

You will be expected to conduct effective research in relation to your area of specialisation (Digital Communication) for both academic and industry purposes. Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

Master of Science in **ACTUARIAL SCIENCE**

(N/0542/7/0002)(07/29)(MQA/PA17434)

Duration:
Full-time - 1 year
Part-time - 3 years

This programme is specially designed to provide:

- Coverage of the IFoA curriculum and exemptions from 7 professional exams (CS1, CS2, CM1, CM2, CP1, CP2 & CP3) offered by the IFoA.
- Course syllabus which covers not only traditional actuarial practice but also advanced data analytics.
- Competent teaching staff with professional or specialised academic qualification, possessing work experience from actuarial industries/ academia.
- Comprehensive guidance to mould graduates to be industry-ready.

Career options
- Actuary
- Data Analyst
- Data Scientist
- Data Engineer
- Risk Analyst
- Financial Analyst
- Business Analyst
- Financial Planning Advisor
- Investment & Portfolio Manager
- Regulator
- Statistician
- Mathematician
- Professor

MD
Premier Digital
Tech Institution

The Benefits of the Programme

- APU is the first and the only university in Asia to provide exemptions from CP1, CP2 and CP3 through the Master of Science in Actuarial Science programme.
- Our MSc programme covers not only traditional actuarial practice but also advanced data analytics, an emerging career option for actuaries.
- Our MSc graduates who achieve the required standard can be eligible for exemptions from CS1, CS2, CM1, CM2, CP1, CP2 and CP3.
- Our MSc programme is ideal for individuals who:
  - Want to enhance their knowledge and skills in actuarial practice and data analytics.
  - Work as actuaries or data scientists.
  - Are pursuing the IFoA/ SOA/ CAS credentials.
  - Want to become university lecturers and/or professors.

Fast track your route to becoming a qualified actuary!

Pursue our Bachelor of Science (Honours) in Actuarial Studies

Earn exemptions from CS1, CS2, CM1, CM2, CB1 and CB2

▼

Pursue our Master of Science in Actuarial Science

Earn exemptions from CP1, CP2 and CP3

▼

Complete CB3

▼

Earn Two Years of Work Experience

▼

Become an IFoA Associate Member!

Modules & Project

This programme comprises 14 coursework modules and a Project. There are 12 compulsory Core Modules, 1 Project and you will choose 2 elective modules from those listed.

Pre-Requisite Module (For Non-Actuarial Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Introduction to Actuarial Mathematics
- Statistics

Core Modules
- Professional Communication
- Actuarial Practice I
- Risk Modelling and Survival Analysis I
- Actuarial Statistics I
- Actuarial Mathematics I
- Modelling in Actuarial and Analytics
- Actuarial Practice II
- Financial Engineering and Loss Reserving I
- Actuarial Statistics II
- Actuarial Mathematics II
- Application in Industry Practices
- Data Analytics Programming
- Industry-based Project

Elective Modules (Choose 2)*
- Risk Modelling and Survival Analysis II
- Financial Engineering and Loss Reserving II
- Big Data Analytics and Technologies
- Advanced Business Analytics and Visualization

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Project

You will be expected to demonstrate an ability to plan and undertake a research programme, to undertake a thorough investigation of their chosen area of study, to extend knowledge in relation to their chosen area of study and to defend their work to academic peers. The project report should demonstrate deep understanding of the theories and concepts, and the application of theoretical knowledge to a real world problem for business and industry.

Institute
and Faculty
of Actuaries

ACCREDITED

1st in Malaysia & Asia and 6th in the World
to provide exemptions from IFoA professional examination CP1, CP2 and CP3.

Master of Education in Learning Design and Technology

Unlock the Future of Education with Innovative Learning Design

In an age where education and technology converge, the Master of Education in Learning Design and Technology at APU empowers professionals from all backgrounds to lead the way. Dive into AI-driven environments, master digital learning design, and innovate with advanced assessment techniques. Whether you're an educator or from another field, this programme equips you with the skills to create impactful learning experiences and drive educational innovation. Join us to shape the future of learning and make a lasting difference in the world.

Programme Alignment with MIE Expert Requirements
Your Path to Microsoft Innovative Educator Expert Skills

Our curriculum equips you with cutting-edge digital tools and innovative teaching approaches, positioning you for this prestigious recognition and leadership in educational technology.

100%

100%

Master programme

Postgraduate Diploma

(% indicate coverage levels of required modules)
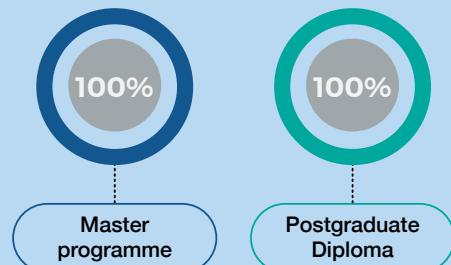

Benefits of Becoming a MIE Expert:
- Join a global community of educational technology leaders.
- Access exclusive Microsoft resources and development opportunities.
- Gain professional recognition as an educational innovation leader.
- Collaborate with like-minded professionals worldwide.

* Self-nomination is required and renewable on yearly basis.

Master of Education in
LEARNING DESIGN AND TECHNOLOGY

(N/0114/7/0026)(8/29)(MQA/PA17659)

Duration:

Full-time - 1+ years

This programme is specifically designed to:

· Innovative curriculum that combines the latest in learning sciences, AI - driven environments and cutting edge digital technologies.

· Professional development in applying practical skills taught by industry experts to design customized educational experiences.

· Supportive learning environments with state-of -the-art facilities and a variety of learner centric teaching methods to foster independent learning through research informed teaching.

Career options

· Learning Design Specialist
· E-Learning Trainer
· Instructional Designer
· Digital Learning Designer
· Adaptive Learning Designer
· Educational Technology Executive
· Curriculum Developer
· Educational Technology Manager
· Corporate Training Manager
· Education Technology Entrepreneur
· Data Scientist in Education
· Education Planning Advisor
· Education Policy Advisor

The Benefits of the Programme

Our master's programme offers a transformative learning experience, equipping you with the skills and knowledge to excel in the ever-evolving field of education:

· Comprehensive Mastery: Gain a deep understanding of learning design and technology, integrating essential topics from learning sciences to AI-driven environments.

· Practical Skills: Develop hands-on experience with advanced digital technologies to create personalised learning environments.

· Leadership in Innovation: Cultivate your capacity for visionary leadership, ethical practices, and data-informed decision-making.

This programme imparts advanced knowledge and cultivates practical skills necessary for tomorrow's educational leaders.

Who Should Attend

This programme is for those who want to be at the forefront of educational innovation, shaping the future of learning in various settings, from traditional classrooms to corporate training environments and online platforms.

This programme is ideal for individuals who:
· Work as teachers, trainers, educational administrators, or instructional designers.
· Are passionate about integrating technology into educational settings and improving learning outcomes.
· Want to lead technology integration initiatives in schools, universities, or corporate training departments.
· Are committed to lifelong learning and staying current with the latest trends in educational technology.
· Have a keen interest in addressing educational challenges through technological solutions.

Modules & Project

This programme comprises 9 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 2 elective modules from those listed.

Pre-Requisite Modules (For Non-Education Students)
Duration: 1 month (Full-Time)
· Pedagogy for Teaching in a Digital Age
· Principles of Curriculum Design

Core Modules
· Learning Sciences
· Digital Learning Environments
· Innovative Assessments
· Learning Design
· AI Driven Learning Resources
· Research Methodology
· Learning Analytics for Decision Making
· Project

Elective Modules (Choose 2)*
· Cybersecurity in Educational Technology
· Video Games and Education
· Managing Creativity and Innovation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Project

You will be expected to demonstrate the ability to plan and undertake a research project, conduct a thorough investigation of your chosen area of study, extend knowledge related to this area, and defend your work to academic peers. The project report should demonstrate a deep understanding of relevant theories and concepts, as well as the application of theoretical knowledge to real-world problems in business and industry.

Master of Philosophy in **ENGINEERING** (R2/0710/7/0005)(04/32)(MQA/FA6112)
Master of Philosophy in **MANAGEMENT** (R/0414/7/0091)(05/29)(MQA/FA9018)
Master of Science in **COMPUTING** (R/0614/7/0006)(06/29)(MQA/FA9019)
Master of Philosophy in **IMMERSIVE TECHNOLOGIES AND VIDEO GAME STUDIES** (N/0211/7/0010)(05/32)(MQA/PA18157)

Duration:
Full-time - 2 years
Part-time - 3-4 years

This programme is specifically designed to provide:

· Knowledge to enhance technical capabilities within the subject area.

· Understanding of how to innovate, generate and manage the creation of new ideas.

· In-depth knowledge of a certain domain of knowledge, that is related to management and computing.

· Advanced research experience and skills that enable students to pursue a PhD programme.

Career options
Master of Philosophy in Engineering
· Academic / Lecturer
· Quality Assurance Specialist
· Researcher
· Product Design and Developer
· R&D Engineer
· Project Engineer
· Engineering Consultant

Master of Philosophy in Management
· Data Analyst
· Academic / Lecturer
· Researcher

Master of Science in Computing
· Computer and Information Systems
· Manager
· IT Director
· IT Research and Development Leader
· Computing Scientist
· University Lecturer
· IT Project Manager

Master of Philosophy in Immersive Technologies and Video Game Studies
· Interactive Experience Designer
· Advanced User Experience Strategist
· Immersive Digital Innovation Specialist
· Immersive Technology Scholar - Practitioner

Conversion to PhD

Students of the Research Degree programme may convert to a PhD candidate if they satisfy all the criteria below:

(a) Display excellent progress in their research.

(b) Able to demonstrate the potential of their project to be expended to PhD level.

(c) Pass a rigorous assessment.

Successful conversion means that the student will no longer be a Research Degree candidate but will instead become a PhD candidate with their candidature start date backdated to their original Research Degree registration date. Hence, it allows the student to gain a PhD award within a shorter timeframe, without the need to complete a Masters programme.

Modules & Assessments

This programme is conducted by research and is assessed via oral presentations and reports at various junctures, including a Proposal Defence, regular half-yearly progress monitoring at research colloquiums, Work Completion Defence, Thesis Examination and Viva Voce. Students would need to take one taught module on Research Methodology to gain the pre-requisite knowledge to effectively carry out their research. Regular discussions with the supervisors would be expected to ensure the direction of research as well as the quality and significance of the findings.

Programme Structure / Process Flow

Application Process
Ideally, student works with potential supervisors to develop proposal.

Start of Candidature			
At first opportunity in Year 1	**Complete all required modules (if any)**	Must pass research methods module Research Methodology for those without a research background.
Within the first 9 months	**Research Colloquium**	Arrange with Programme leader for a presentation slot to gather feedback on research proposal.
Within the first 12 months	**Proposal Defence (PD)**	Submit detailed proposal document. Presentation to examination panel.

* By end of Year 1: may apply to convert MPhil to PhD (must pass assessment) PhD candidature backdated to MPhil registration date

End of Candidature			
4 months before minimum candidature period	**Work Completion Defence (WCD)**	Submit draft thesis. Presentation of completed work.
Before Maximum candidature period	**Submit Thesis for Examination**	Comb-bound thesis copies for examination.
Upon receipt of all examiners' reports	**Viva Voce**	Presentation of completed work to Examination board.
	Award of Degree	MPhil (or PhD, if converted)

100% Online

Master Degree
Open & Distance Learning

Open & Distance Learning (ODL)

- The ODL (Open & Distance Learning) programmes are designed to address the theoretical, practical and scientific skills and contribute towards new and meaningful knowledge in their field of expertise.
- ODL allows students to learn anytime, anywhere at their own pace - this power of freedom has ignited more interest & excitement in learning.
- All the Master (ODL) programmes are available for part-time study mode. The minimum duration of study is 2.5 years.
- Students are to register the modules on a modular basis. Each module will be offered over a two-month duration.

- **Master of Science in Artificial Intelligence (ODL)**
- **Master of Science in Cyber Security (ODL)**
- **Master of Science in Data Science and Business Analytics (ODL)**
- **Master of Business Administration (ODL)**
- **Master of Business Administration with a specialism in:**
  - *Digital Leadership (ODL)*
  - *Artificial Intelligence (MBAi) (ODL)*
  - *Supply Chain Management (ODL)*
  - *Sustainability Leadership (ODL)*
  - *Business Analytics (ODL)*
  - *Oil and Gas Management (ODL)*
  - *Hospitality and Tourism (ODL)*
- **Master of Arts in Design Innovation Management (ODL)**
- **Master of Education in Learning Design and Technology (ODL)**
- **Postgraduate Diploma of Education in Learning Design and Technology (ODL)**
- **Postgraduate Certificate of Education in Learning Design and Technology (ODL)**

100% Online

Duration:
ODL - 2.5-3 years

This programme is specifically designed to provide:

- Advanced skills and techniques in artificial intelligence
- Research opportunities to solve meaningful industrial problems with artificial intelligence techniques
- Advanced research opportunities in artificial intelligence in preparation for doctoral studies.

Career options

- Software Engineer
- Data Scientist
- AI Researcher
- Intelligence Specialist
- Consultant
- AI Data Analyst
- Machine Learning Engineer
- Robotics R&D Engineer
- Machine Vision Engineer
- Artificial Intelligence Analyst
- Deep Learning Scientist

MD
Premier Digital Tech Institution

DUAL DEGREE

Open & Distance Learning (ODL)

Master of Science in
ARTIFICIAL INTELLIGENCE (ODL)

(N-DL/0613/7/0004)(12/27)(MQA/PA16033)

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

- Gain hands-on experience to implement Artificial Intelligence (AI) to solve problems
- Grasp knowledge on a wide range of subject matters ranging from Machine Learning, Robotics to Natural Language Processing.
- Effectively undertake and manage large scale and complex Artificial Intelligence (AI) projects.
- Engage in the design and implementation of Artificial Intelligence (AI) systems of high quality and reliability.
- Appreciate problems and suggest solutions associated with the development of Artificial Intelligence (AI) systems.
- Appreciate how an efficient Artificial Intelligence (AI) technology based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Draw upon the body of knowledge and be able to overcome human limits to solve new problems using Artificial Intelligence (AI).

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Artificial Intelligence. In addition, professionals and managers who wish to enhance themselves with Artificial Intelligence knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Artificial Intelligence / Software Engineering / Data Science background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)
- Programming in Python
- Database for Data Science
- Fundamentals in Artificial Intelligence

Core Modules
- Artificial Intelligence
- Image Processing and Computer Vision
- Fuzzy Logic
- Applied Machine Learning
- Computational Intelligence Optimization
- Natural Language Processing
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*
- Applied Robotics
- Pattern Recognition
- Expert Systems and Knowledge Engineering
- Business Intelligence Systems
- Multivariate Methods for Data Analysis
- Deep Learning

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project

You will be expected to conduct effective research in relation to Artificial Intelligence for both academic and industry purposes. Either route will require you to plan and conduct effective academic research, and produce one academic paper, consultancy report or academic paper in relation to an aspect of Artificial Intelligence.

TIBCO

TIBCO certification is awarded to students who complete:
- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

100% Online

Duration:
ODL - 2.5-3 years

This programme is specifically designed to provide:

- Knowledge and applied skills in data science, big data analytics and business intelligence.
- Overall understanding of the impact of data science upon modern processes and business.
- Exposure towards data science tools and techniques, as well as methods of data collection and utilisation, to tun data into useful information via various processes.

Career options
- Data Engineers
- Data Analyst
- Business Analyst
- Data Scientist
- Chief Technology Officer (CTO)
- Data Analytics Manager
- Business Analyst Manager
- Data Innovation Manager
- Machine Learning Scientist
- Business Process Engineer
- Data Wrangler / Munger / Miner
- Business Intelligence Manager
- Analytics & Reporting Manager
- Decision Analytics Manager

Master of Science in
DATA SCIENCE AND
BUSINESS ANALYTICS (ODL)

(R-DL/0613/7/0026)(03/31)(MQA/FA14220)

Open & Distance
Learning (ODL)

The Benefits of the Programme

- In addition to the degree award, a Joint Professional Certification will be offered by SAS Institute, USA.
- 30% of the curriculum will allow for mini projects assessed as in-course work allowing for practical skills development in Data Analytics.
- The curriculum covers a wide range of subject matter from Analytical Technologies, Exposure to tools such as R & SAS Modelers, Data Visualisation, Customer/User Behavioural Studies, Forecasting Methods and to Presenting the Business Intelligence reports.
- External Programme Annual Reviews by International University Partners.
- Programme Support by an Industry Advisory Panel involving data analytical experts from Petronas ICT, RedTone, SharePoint, CyberSecurity Malaysia, Maxis, IBM, Microsoft, Fusionex and Axiata.
- Research opportunities via APU's Centre of Analytics - APCA.

Who Should Attend

This programme is designed to provide students with knowledge and applied skills in data science, big data analytics and business intelligence. It aims to develop analytical and investigative knowledge and skills using data science tools and techniques, and to enhance data science knowledge and critical interpretation skills. Students will understand the impact of data science upon modern processes and businesses, be able to identify, and implement specific tools, practices, features and techniques to enhance the analysis of data.

Modules & Project

This programme comprises 11 coursework modules and a Capstone Project (2 parts). There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 1 pathway (3 specialisation modules).

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)
- Programming in Python
- Database for Data Science
- Statistics

Core Modules
- Big Data Analytics & Technologies
- Data Management
- Business Intelligence Systems
- Research Methodology for Capstone Project
- Applied Machine Learning
- Data Analytical Programming
- Multivariate Methods for Data Analysis
- Capstone Project 1
- Capstone Project 2
- Advanced Business Analytics and Visualisation

Specialisation Modules*
(Choose 1 Pathway only)

Pathway 1 (Business Intelligence):
- Behavioural Science, Social Media and Marketing Analytics
- Time Series Analysis and Forecasting
- Strategies in Emerging Markets
  OR Multilevel Data Analysis
  OR Operations Research and Optimization

Pathway 2 (Data Engineering):
- Cloud Infrastructure and Services
- Deep Learning
- Natural Language Processing
  OR Building IoT Applications
  OR Data Protection and Management

* Specialisation modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

TIBCO certification is awarded to students who complete:
- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

POWER of Analytics and Data Driven Marketing

100% Online

Master of Science in
CYBER SECURITY (ODL)

(N-DL/0613/7/0033)(07/29)(MQA/PA17433)

DUAL DEGREE

Open & Distance Learning (ODL)

Duration:

ODL - 2.5-3 years

This programme is specifically designed to provide:

- Opportunity for professional development at an advanced level within the area of Cyber Security.
- Ability to further develop specialisation gained in taught modules through an extensive research-based and/or technical based dissertation, to prepare a subject matter expert in the field.
- APU is also poised to become a frontrunner in cyber security research through the establishment of the Forensics and Cyber Security (FSEC) Research Centre, through which research activities will be undertaken to challenge boundaries in the application of cyber security.

Career options

- Security Architect
- Cyber Security Analyst / Consultant
- Information Security Analyst
- Cyber Security Incident Response Consultant
- Digital Forensic Investigator
- Cyber Security Engineer
- Information Security Engineer
- Cyber Security Manager
- Information Security Manager

Certification by:

MD
Premier Digital
Tech Institution

The Benefits of the Programme

- The curriculum covers a wide range of industry relevant subject areas in Security Operations Centre (SOC) and Incident Response, Security Auditing and Assessment, Advanced Ethical Hacking, E-Investigation, Data Analytics in Cyber Security etc.
- External reviews conducted by Cyber Security Malaysia (CSM), KPMG and F-Secure during the development of the programme curriculum.
- Programme Support by an Industry Advisory Panel involving cyber security experts from Cyber Intelligence, Cyber Test Systems, Akati Consulting Group and Cyber Security Malaysia (CSM).
- A fully-functional Security Operations Centre (SOC) that allows students to have handson cybersecurity operations platform to monitor live data which allows them to perform real-time cyber security monitoring to fortify network defense with global threat intelligence and launching faster response on cyber security incidents.
- A full-fledged Cyber Threats Simulation and Response Centre – Cyber Range is also included within the Cyber Security Talent Zone in APU. Cyber Range incorporates latest technologies and a military grade cyber-defence system, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens.
- A technical project related to Cyber Security as dissertation in the final semester.
- Research opportunities for students via APU's Forensic and Cyber Security Research Centre - FSEC.

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Cyber Security. In addition, professionals and managers who wish to enhance themselves with Cyber Security knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Cyber Security / Digital Forensics background will also find this programme worthwhile as a path to further enhance their academic qualifications..

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)
- Programming in Python
- Database for Data Science
- Digital Forensics and Cyber Security Tools

Core Modules

- Information Security Design
- Data Analytics in Cyber Security
- Cyber Security & Threats
- Security Operations Center & Incident Response
- Advanced Ethical Hacking
- Advanced Digital Forensics
- Research Methodology in Computing & Engineering
- Project Paper

Elective Modules (Choose 3)*

- Network Design & Performance
- Information Security Architectures
- Security Audit and Assessment
- E-Investigation
- Applied Scripting in Cyber Security

*Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project

As part of this course, you are expected to complete an extensive project paper in relation to Cyber Security for both academic and industry purposes. This project paper will be supervised by a member of academic staff as the main supervisor. It may involve working with an external organisation (probably directly relevant to your work or organisation or any of our industry partners). You are given considerable flexibility in choosing any Cyber Security related topics to base your project paper. As for the deliverables, you are required to come up with a prototype / simulation / framework etc. (the list is just an example and not limited to only these) and to produce one project paper and a publishable conference / journal paper consists of summary of the work.

Creative Futures Project

Student will need to complete an industry-based major projects along with evidence and output related to Design Innovation Management field. There will be a final exhibition and presentation towards the end of the course.

This programme will enhance graduates' managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner. This enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world today.

Framework adopted from Design Innovation Framework Diagram

100% Online

Duration:
ODL - 2.5-3 years

This programme is specifically designed to provide:

- Innovative curriculum that combines the latest in learning sciences, AI - driven environments and cutting edge digital technologies.
- Professional development in applying practical skills taught by industry experts to design customized educational experiences.
- Supportive learning environments with state-of -the-art facilities and a variety of learner centric teaching methods to foster independent learning through research informed teaching.

Career options

- Teacher
- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer
- Educational Technology Manager
- Corporate Training Manager
- Education Technology Entrepreneur
- Data Scientist in Education
- Education Planning Advisor
- Education Policy Advisor

Master of Education in
LEARNING DESIGN AND TECHNOLOGY (ODL)

(N-DL/0114/7/0025)(8/29)(MQA/PA17660)

DUAL DEGREE

Open & Distance Learning (ODL)

The Benefits of the Programme

Our master's programme offers a transformative learning experience, equipping you with the skills and knowledge to excel in the ever-evolving field of education:

- Comprehensive Mastery: Gain a deep understanding of learning design and technology, integrating essential topics from learning sciences to AI-driven environments.
- Practical Skills: Develop hands-on experience with advanced digital technologies to create personalised learning environments.
- Leadership in Innovation: Cultivate your capacity for visionary leadership, ethical practices, and data-informed decision-making.

This programme imparts advanced knowledge and cultivates practical skills necessary for tomorrow's educational leaders.

Who Should Attend

This programme is for those who want to be at the forefront of educational innovation, shaping the future of learning in various settings, from traditional classrooms to corporate training environments and online platforms.

This programme is ideal for individuals who:
- Work as teachers, educator, trainers, educational administrators, or instructional designers.
- Are passionate about integrating technology into educational settings and improving learning outcomes.
- Want to lead technology integration initiatives in schools, universities, or corporate training departments.
- Are committed to lifelong learning and staying current with the latest trends in educational technology.
- Have a keen interest in addressing educational challenges through technological solutions.

Modules & Project

This programme comprises 9 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 2 elective modules from those listed.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)
- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules
- Learning Sciences
- Digital Learning Environments
- Innovative Assessments
- Learning Design
- AI Driven Learning Resources
- Research Methodology
- Learning Analytics for Decision Making
- Project

Elective Modules (Choose 2)*
- Cybersecurity in Educational Technology
- Video Games and Education
- Managing Creativity and Innovation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project

You will be expected to demonstrate the ability to plan and undertake a research project, conduct a thorough investigation of your chosen area of study, extend knowledge related to this area, and defend your work to academic peers. The project report should demonstrate a deep understanding of relevant theories and concepts, as well as the application of theoretical knowledge to real-world problems in business and industry.

Postgraduate Diploma of Education in
LEARNING DESIGN AND TECHNOLOGY (ODL)

DUAL DEGREE

Open & Distance
Learning (ODL)

(N-DL/0114/7/0031)(09/29)(MQA/PA17658)

Duration:

ODL - 2 years

This programme is specifically designed to provide:

- Innovative Curriculum: Dive into a program that combines the latest in learning sciences, AI-driven environments, and cutting-edge digital technologies.

- Professional Development: Learn from industry experts and gain practical skills to design adaptive, inclusive educational experiences.

- Supportive Learning Environment: Benefit from state-of-the-art facilities and a variety of teaching methods designed to foster independent learning and research.

Career options

- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer
- Educational Technology Manager
- Corporate Training Manager
- Education Technology Entrepreneur
- Education Technology Policy Advisor

The Benefits of the Programme

Our Postgraduate Diploma of Education in Learning Design and Technology provides an in-depth exploration of key areas essential for educational innovation and leadership:

- Comprehensive Skill Development: Enhance your ability to design, implement, and evaluate effective learning experiences across a range of contexts.

- Applied Learning: Engage in Professional Practice to apply your knowledge in real-world settings, developing critical skills in adaptive and inclusive learning design. Learn to manage creativity and innovation while addressing diverse educational challenges.

- Leadership and Career Advancement: Develop the expertise needed to lead educational innovation and drive change across diverse environments. Engage in research that fosters life-long learning, equipping you with the skills to adapt and grow continuously in an evolving educational landscape.

Who Should Attend

This Postgraduate Diploma programme is ideal for individuals who seek to enhance their expertise in the integration of technology into education and training:

- Teachers, educators and trainers looking to enhance their skills in digital learning, innovative assessments, and educational technology.

- Instructional Designers and Learning Technologists who want to explore advanced topics like AI-driven resources and cybersecurity, etc.

- Educational Leaders and Corporate Trainers aiming to lead technological innovation and manage creativity in various learning environments.

- Professionals Transitioning to Education interested in gaining foundational knowledge in learning design and technology.

Modules & Project

The programme comprises of 8 coursework modules and a Professional Practice. There are 6 compulsory Core Modules (including Research Methodology module) and you will have to choose 2 elective modules from those listed.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)
- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules
- Learning Sciences
- Digital Learning Environments
- Innovative Assessments
- Learning Design
- AI Driven Learning Resources
- Research Methodology
- Professional Practice

Elective Modules (Choose 2)*
- Cybersecurity in Educational Technology
- Video Games and Education
- Managing Creativity and Innovation

*Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Professional Practice

Professional Practice equips participants with essential skills for career growth in programme creation, training, and development. Participants will apply their knowledge in a chosen educational or training setting, designing, delivering, and reflecting on a session. They will receive observation and feedback, using it to continuously improve and achieve key competencies.

Postgraduate Certificate of Education in
LEARNING DESIGN AND TECHNOLOGY (ODL)

DUAL DEGREE

Open & Distance Learning (ODL)

(N-DL/0114/7/0032)(09/29)(MQA/PA17661)

Duration:

ODL - 1 year

This programme is specifically designed to provide:

- Essential competencies and skills that empower you to create impactful educational experiences across diverse settings.
- Hands-on experience through direct engagement with cutting-edge theories and strategies in real-world educational contexts, enhancing your ability to innovate and adapt in diverse learning environments.
- Expert knowledge through learning opportunities guided by experienced professionals and leaders in the field of educational technology.

Career options

- Teacher
- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer

The Benefits of the Programme

Our Postgraduate Certificate of Education in Learning Design and Technology offers a dynamic introduction to the foundational elements of digital learning and educational innovation:

- Foundational Knowledge: Understand how to create engaging and effective learning experiences in digital contexts.
- Practical Application: Gain hands-on experience through the Professional Practice, where you will apply your knowledge in real-world settings, developing the skills to manage creativity and innovation in diverse educational environments.
- Cutting-Edge Insights: Explore current trends in educational technology. Stay at the forefront of innovation by understanding the latest tools and techniques for enhancing learning through technology.

Who Should Attend

This Postgraduate Certificate programme is ideal for individuals who seek to enhance their expertise in the integration of technology into education and training:

- Teachers, educators and trainers seeking to gain foundational knowledge in digital learning and innovative assessment methods.
- Professionals in Education Technology looking to explore new trends in education.
- Career Changers interested in entering the field of learning design and educational technology with a focus on practical application.

Modules & Project

The programme comprises of 4 coursework modules and a Professional Practice. There are 3 compulsory Core Modules and you will have to choose 1 elective module from those listed.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)

Doctor of Philosophy & DBA Programmes

- **PhD in Computing** (R2/0610/8/0002)(07/27)(MQA/FA0928)
- **PhD in Technology** (R2/0611/8/0007)(07/27)(MQA/FA2107)
- **PhD in Management** (R2/0410/8/0007)(08/28)(MQA/FA2094)

- **PhD in Finance** (R2/0412/8/0003)(09/28)(MQA/FA2093)
- **Doctor of Philosophy in Engineering** (R2/0710/8/0004)(04/32)(MQA/FA6113)
- **Doctor of Business Administration** (N/0414/8/0071)(04/28)(MQA/PA14557)

100% Online

Open & Distance Learning (ODL):

- **PhD in Computing** (N-DL/481/8/0790)(11/27)(MQA/PA14010)
- **PhD in Technology** (N-DL/482/8/0173)(11/27)(MQA/PA14011)

- **Doctor of Philosophy in Management** (N-DL/0414/8/0072)(11/27)(MQA/FA14009)

Why our APU PhD by Research & DBA Programmes?

- You will be assigned to a group of highly qualified supervisors.
- Wide range of latest research areas in the fields of computing and business administration areas.
- We have our regular research workshops, colloquium and seminars facilitated by local and international academicians and professionals.
- Comprehensive Student Support Services.
- Resourceful online databases.

DOCTOR OF PHILOSOPHY PROGRAMME STRUCTURE

Application Process

Ideally, student works with potential supervisors to develop proposal.

Phase	Timing	Stage	Description
Start of Candidature	At first opportunity in Year 1	**Complete all required modules**	Must pass research methodology module.
	Within first 12 months	**Proposal Defence (PD)**	Within the first 9 months, research colloquium, to present before a panel to gather feedback on research propsoal Submit detailed proposal document. Presentation to examination panel.
	Every 6 months until thesis submission (May & November)	**Progress Monitoring / Mid-Candidature Defence**	Progress reporting and Presentation on progress, evaluated by a panel.
	6 months before minimum candidature period	**Work Completion Defence (WCD)**	Submit draft thesis. Presentation of completed work.
End of Candidature	Before Maximum candidature period	**Submit Thesis for Examination**	Comb-bound thesis copies for examination.
	Upon receipt of all examiners' reports	**Viva Voce**	Presentation of completed work to Examination board.
		Award of Degree	PhD

DURATION FOR PhD / DBA

The minimum and maximum duration of the PhD / DBA programme are as follows:

Study mode	Normal minimum period*	Normal maximum period**
Full Time	3 years	5 years
Part Time	4 years	6 years

* Completion of studies is subject to approval from the Senate

** Candidates with Extenuating Circumstances may apply for approval to extend the duration of study

Students are required to enrol in the Research Methods module to fill the gaps in research skills.

Minimum Entry Requirement

Doctor of Philosophy (PhD) Programmes
- A Masters degree in a related field accepted by the APU Senate
- Other qualifications equivalent to a Masters degree that are accepted by the APU Senate

Doctor of Business Administration (DBA)
- Master's degree in related fields, or its equivalent qualification as accepted by the Senate.
- Master's degree in non-related fields as accepted by the Senate and with relevant working experience, subject to a rigorous internal assessment.
- Master's degree in non-related fields as accepted by the Senate and without relevant working experience, subject to passing pre-requisite courses.

- Healthcare Systems
- Technological Innovation and Change
- Information Systems Adoption
- Image Processing
- Graph Theory/ Combinatorics
- Computational Analysis
- Big Data Analytics
- Cloud Computing
- Internet of Things (IoT)
- Natural Language Processing

Business & Management

- Strategy of Multinational Corporations
- Strategic Framework for SDG6 Adoption - Malaysian In-Bound Technology Transfer Model
- International Human Resource Management
- Business Innovation
- Digital Transformations
- Green Business and Marketing
- Human Resource Management
- Organisation Behaviour
- Public Administration
- Customer Satisfaction
- Work Quality
- Strategic Management
- Supply Chain Operation Management
- Leadership and Corporate Social Responsibility
- Sustainable Supply Chain
- Digital Marketing
- International Entrepreneurship
- Sustainable Development

Finance

- Finance
- Financial Economics, Time Series Econometrics
- Risk Management
- Portfolio Management
- Financial Statement Analysis
- Monetary Movements, Financial Markets
- Investment
- Financial Technology (FinTech)
- Financial Planning
- Financial Management
- Islamic Finance
- Corporate Governance
- Econometrics

Doctor of **BUSINESS ADMINISTRATION**

(N/0414/8/0071)(04/28)(MQA/MQA/FA14557)

Duration:
Full-time - 3 years
Part-time - 4 years

This programme is designed for executives, professionals and leaders to prepare them for digital transformation, by:

- Applying innovation and technology in problem-solving—guided by Design Thinking ideals.
- Employing real-world coaching and providing an entrepreneurial outlook via our in-class and value-added activities.
- Participating in thought leadership sessions delivered by our academic staff and Industry partners.
- Learning and collaborating in a highly dynamic and interactive world-class environment.
- Future-proofing themselves and enabling them to lead digital transformation in organisations.

Career options
- Management Analyst
- Business Consultant
- Business Research Analyst
- Market Research Analyst
- Entrepreneur
- Economist
- Professor
- Chief Marketing Officer (CM0)
- General Manager
- Analytics & Reporting Manager
- Decision Analytics Manager
- Management Consultant
- Chief Executive Officer (CEO)
- International Marketing Manager

CMI Chartered Management Institute
ACCREDITED

MD
Premier Digital Tech Institution

The Benefits of the Programme

- The APU DBA prepares you to address the challenges within an increasingly Volatile, Uncertain, Complex and Ambiguous (VUCA) digitalised world.
- The knowledge and experience gained via APU's DBA will allow you to sharpen your skills and competencies in decision making, strategic thinking, and problem solving - be it for work or personal aspirations. The programme is also designed to enhance your research skills which can be applied to strategic formulation, policy formation and organisational risk assessment and mitigation plans.
- The APU DBA programme has a unique digital emphasis and is a technology-infused leadership programme that focuses on future-proofing leaders in a highly volatile and uncertain future.
- The Malaysian Institute of Accountants (MIA) has endorsed APU DBA to enhance and progress existing business knowledge, gaining perspective of contemporary business issues, future trends, and complex problems that require analytical skills to solve.
- Under a strategic collaboration with the Chartered Management Institute, UK, you have the exciting opportunity of enrolling for the exclusive APU-CMI Dual Certification by adding a separate CMI qualification to your APU qualification, you are really on the road to success to be truly recognised globally as a Professional Manager.

Modules & Dissertation

The emphasis of the DBA programme is on collaboration, interpersonal relationship building and applied experiential learning. Students are required to complete 10 taught modules on the DBA which are delivered in a combination of online and face-to-face blended learning modes depending on the module.

**Pre-Requisite Modules (for non-business students)**
Duration: 1 month (Full-time), 2 months (Part-time)
- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Modules
- Strategic Management for Integrated Value Creation
- Accounting and FinTech in Digital Transformation
- Advanced Marketing Intelligence and Research
- Research Methodology
- Leadership and Organisational Science
- Digital Thinking and Innovation Management
- Data Science and Business Analytics
- Quantitative Research OR Qualitative Research
- Digital Business Transformation
- Global Economic and Business Issues
- Dissertation

The modules are assessed through flexible assessment methods with minimal examinations, catering to the needs of busy working professionals.

Endorsed by:

mia 1967
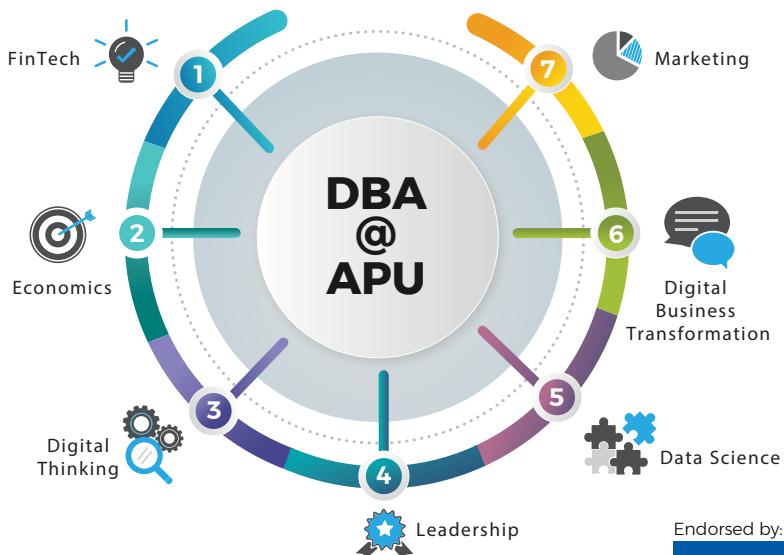

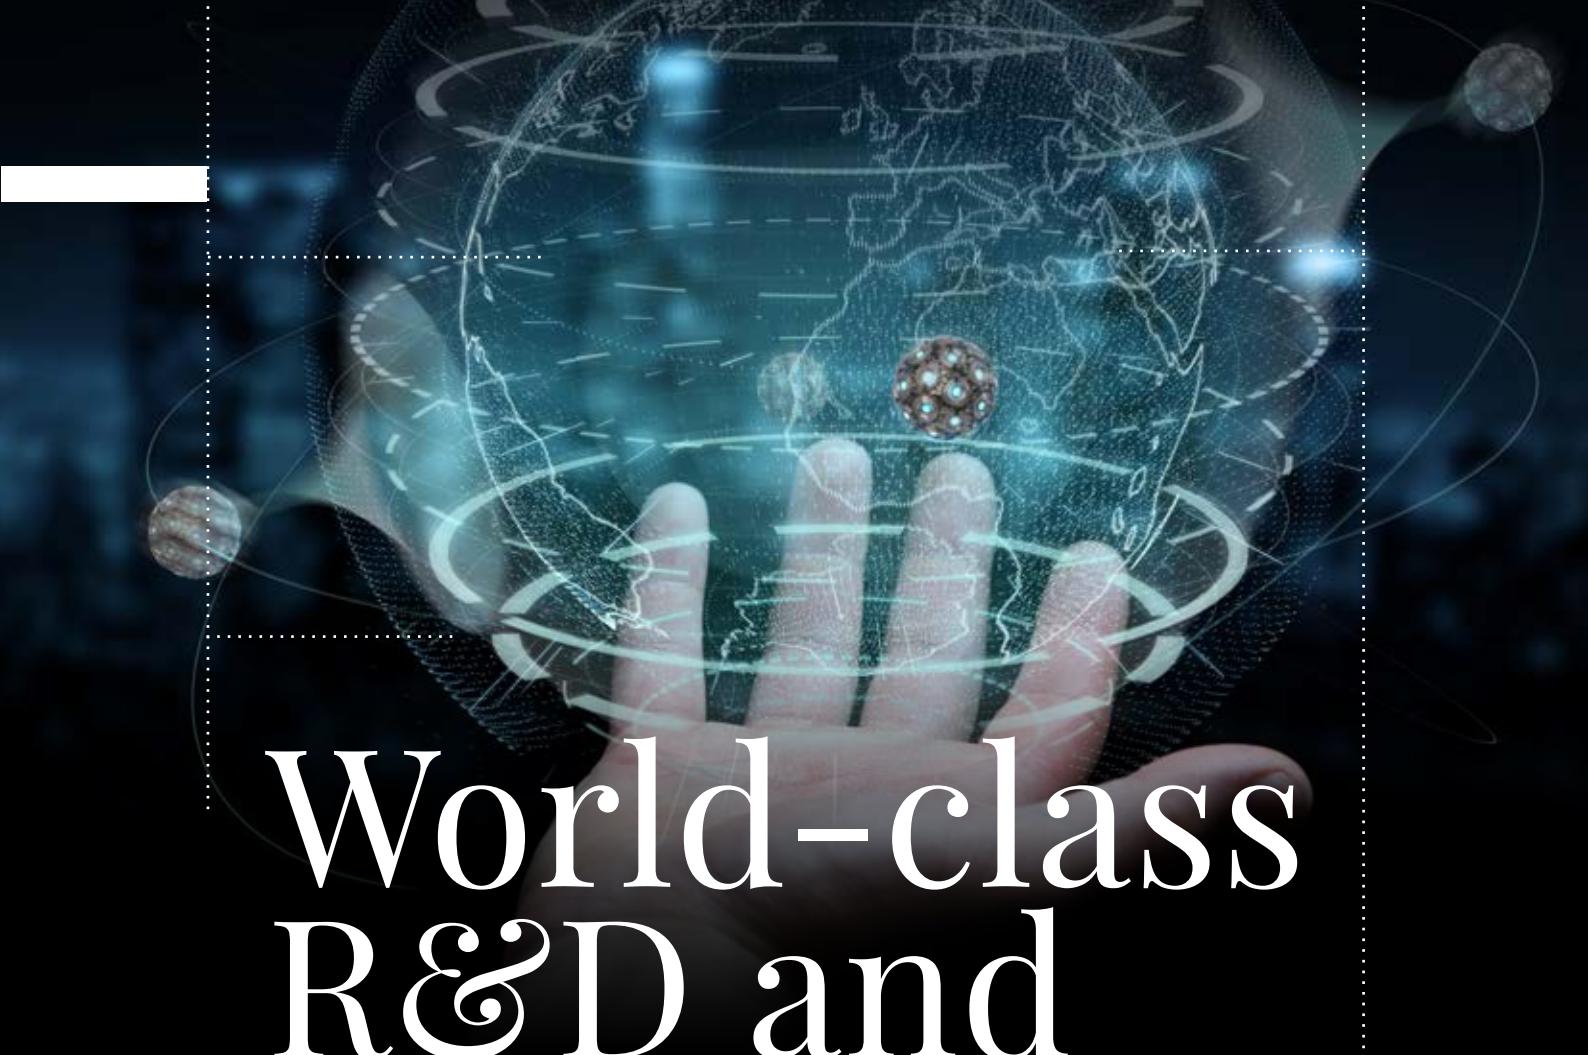

World-class R&D and Innovation

ACADEMIC RESEARCH

For our staff, learning is a continuous journey where we keep abreast with the latest knowledge in a variety of fields. Our academic staff publish papers and present them at conferences worldwide. Some of the areas of research include:

- Embedded Systems & RFID
- Biometrics
- Games Engines
- 3D Graphics and Virtual Reality
- Security
- New Media Technologies
- Knowledge Management
- Mobile Learning
- Wireless Networks and Internet of Things (IoT)
- Adding Facial Expressions to Talking Head Models
- Marketing Professional Services
- Two and Three Dimension Audio-Visual Speech Synthesis
- Handwritten Signature Verification Using a Single Master Signature

- Customer Care
- E-Learning
- Entrepreneurial Business
- Various Aspects of Accounting
- International Marketing
- Generation of Business Ideas
- Organisational Culture Change
- Strategic Diversification Evaluation
- Artificial Intelligence
- Cloud Computing
- Security and Forensics
- Internet of Things (IoT)
- Malware Analysis
- Big Data

INNOVATIVE INDUSTRY-BASED RESEARCH CENTRES @ APU

Asia Pacific Centre of Analytics (APCA)

Asia Pacific Centre of Analytics – APCA is established in association of multi-discipline expertise from various schools in APU. The vision of APCA is to establish the foundation to develop young data scientists to meet the demands in Malaysia and global. The expertise and experience cover areas of Data Management, Machine Learning, Behavioral Studies, Business Cases, Statistics and Engineering. The formation directs to broad activities in Big Data ecosystem, in line with National vision to make Big Data Analytics the catalyst for nation's economic development: Creating new area in BDA studies, Embedding BDA topics into Undergraduate and Postgraduate studies, Development of Educational and Industrial Framework, Creating Project Marketplace, Research project commercialisation and crowdfunding, Consultancy and Training Services.

Centre for Research and Development of IoT (CREDIT)

The establishment of Centre for Research and Development of IoT (CREDIT) is a significant milestone that supports the objectives of the Malaysia National IoT Strategic Roadmap initiative. CREDIT aims to provide students and academic staff the opportunities to access IoT-related knowledge and know-how through various activities. It also acts as a hub to support commercialising potential state-of-the-art solutions resulting from R&D projects.

APU IEEE Student Branch

APU IEEE Student Branch, which is part of the Malaysia Section under Region 10 (Asia and Pacific), was formulated in 2014. As a member of IEEE, APU students have a wide variety of resources and valuable opportunities to advance their knowledge and future career. APU Student Branch provides numerous educational, technical, and professional development for its members through special projects, activities, meetings, tours and field trips.

Forensic and Cyber Security Research Centre (FSEC)

The establishment of Forensics & Cyber Security (FSec) center is to be a recognised Forensics and Cyber Security Research and Development Centre which acts as an international resource for government, industry and academia. This vision has kept us on the toe and with the closing of all cases including expert testimonies given by our dedicated analysts.

Centre for Innovation and Entrepreneurship (CIE)

The Centre provides resources for staff and student to innovation and entrepreneurship in a form of a sandbox; supports curricular and co-curricular programming, including workshops, networking events, speakers, talks and internship and start-up programs. Students have access to laboratory space, and other resources to meet their entrepreneurial needs.

Integrated Sustainability & Urban Creativity Centre (ISUC)

ISUC is committed to the mission of cultivating "sustainable shaping and innovating" leading us to be needed by the new era. The overall goal of the research centre is to establish an international, innovative, forward-looking and research-oriented world-class of think tank comprising of students and academic staff researchers with great sense of mission of the era, international perspective and native characteristics.

APU 5G Research Lab

The APU-5G research lab was established to serve as a platform for members from academia, business and industry to collaborate on 5G research to create market ready, innovative 5G technology solutions, applications and business ventures. The APU-5G research lab facilitates research at circuit, system and network level in 5G technologies and also is focused to the pathway for 6G technology to develop a powerful, faster, greener, sustainable network which will be smarter with infusion of AI, ML and Reinforcement learning.

The research lab aims at exploring the cutting edge technologies such as SDN, NFV, mm/THz Wave Band, Radio Access, Massive MIMO, D2D Communication, Ultra Densification, IoT, Big Data, Mobile Computing and fusion of AI and ML for development of 5G core and Radio Access Network Infrastructure. The developed 5G Network Infrastructure will be a platform to develop and test a range of use cases of primary, secondary and tertiary industries and business that are built on communication infrastructure. The 5G lab in association with the other research centers of APU will facilitate research in 5G network security, Network Data Collection and Analysis for Smarter 5G/6GNetwork and Highspeed Sensor Networks for Autonomous Industry.
